=====

On your own research before you trust anything in this text file. I have way of proving any of this except the laser shit as I have lasers. Take a few months to learn everything. Save all the YouTube Videos Linked here. Especially the forensics/artif-forensics shit. Put it on a flash drive in an offsite faraday cage along with a sathphone. At the very least, get the Garmin iReArch Mini Satellite Communicator. Let me say it again for all retarded speeds reading this: DOWNLOAD EVERY THING YOU VIDEO LINKED HEREIN TO A FLASH DRIVE WITH THE PDF OF EVERY ARCHIVE.IS LINK HERE. This text file is basically a fucking small scale library. A compilation of videos and text files. It took a year for me to write this, from the Version 1.0, to Version 10.0 And, if you fuck up and get caught or go blind from handling lasers without appropriate safety measures or equipment, it's your fault. Lastly, this text file is not for everyone. If you are not a chemist, fuck off from the section about tetraethyl orthosilicate. If you aren't a cattle rancher, fuck off from the part about livestock incinerators. If you are not able to get a gun or even know how to shoot, don't even bother with the gun section. If you can't drive, you don't need to know how to back track someone. Don't do shit you heard about in this text file until a MQLS scenario starts. I have no clue about any of this shit and can not guarantee you will survive. You may die from an infection, death, especially if you're first time, you're going to need to know what to do when you're shot or collapse finally starts, then, you can start to think and break it out for a rigorous application. Doing anything in this text file during a scenario will lead to unnecessary deaths and problems as you are not aware of the concepts herein will fuck something up. Furthermore, you must save every file. Wait until you're safe. Wait until you're safe. Wait until you're safe. If you're stucking up on a few things mentioned here, consider the ideas and concepts herein and print this out and put it in a folder or three-ring binder. When it's the right time to use this info, you will know. Unless troops are on your street or the power is out or Antifa is on your block, you don't need this. Do not fuck this up for the anon by using this invaluable resource for stupid shit. Stupid people make mistakes with this kind of information. If you are not 180+ IQ, close the tab now.

- TW01USA Versions 1.0 - 6.0: <https://archive.fo/https://dxb0in.org/upload/TheKnownUnherabilitiesOfTheUSA>
 - TW01USA Version 7.1: <https://archive.is/69W4w>
 For efficiency and brevity's sake, the text file has been broken down.
 Less important shit was archived as a separate thing and is now a Link here to shorten the paste.
 I go into greater depth on a few subjects here.
 I was permabanned from /pol/ by the faggot janies, even on my pass, so this will be updated when I can get to public wifi. <https://archive.md/kRf0h>
 I'm not updating this anymore officially as of 2022-01-08 (January 17th, 2022) (<https://www.longleapexpertise.com/totoluolan.php>)
 I'm aware that this file is now sufficient enough for a novice to become learned and for people in the know to be able to apply the concepts herein.
 - Δ^0 - /06jv/ was the seventh version of this paste.
 - Δ^1 - /0273s/ was the eighth version of this paste.
 - Δ^2 - /k0v0f/ was the original ninth version of this paste.
 - There are several Version 9.0 archives including /08m/, /0xM/, /x0L/, /9h36/, /344H/, /Apt3/ and /eU7t/.
 - This is Version 11.0. The reason this was updated beyond version 9.0 is below.
 - There are several 10.0 copies, including /0gfy0/, /2u1n/, /20C6/, /3yYR/, /7P0sz/ and /o0Mh/.
 Whatever you are currently reading is the current version.
 - I improvised the section on trains.
 - I added shit about Tails, Tor and P2EC, tunnels and burners, swears, bunnies and the kikedemic.
 - I later added shit about Jew female physiology in comparison to white female physiology and redpills on kikes.

ASCII Armor POP Encryption:

Keys (like MD5, RSA, etc) are actually binary data. Usually you see this data encoded as hex / ascii, as this is easier to share. The key is exported in a binary format, but this can be inconvenient when the key is to be sent though email or published on a web page. GnuPG therefore supports a command-line option, -armor, that causes output to be generated in an ASCII-armored format similar to unencoded documents. In general, any output from GnuPG, e.g., keys, encrypted documents, and signatures, can be ASCII-armored by adding the -armor option. Also, fuck the Earm It Act. It's not about protecting kids or stopping pedos. They have laws already for that. They want to eliminate encryption and spy on your activities online so you can be charged for hate speech and terrorism when your bants are too spicy. Nothing but a control measure. Also,

<https://archive.org/details/DavidIrvingTheManipulationOfHistory>
<https://www.bitchute.com/video/9H6zP6HAA/> - "The 'Holocaust' testimonies you DIDN'T hear!"
<https://archive.vn/4u6tT> - "Fla told parent he 'can't say the Holocaust is a factual, historical event' is fired"
<https://www.youtube.com/watch?v=H8KTD5C96> - History schoolteacher says: "There was lots of proof from the Red Cross, that the number of deceased in the WORK camps, they were not other types of camps, they were work camps, they starved because the allies were starving them"

More Miscellaneous Shit On Jews:
Blacks were integrating into the US pretty well in the 50's, before Jewish collective power decide to weaponize them against the Whites using cultural degradation, race baiting, scape goating Whites for slavery, and flooding Black communities with drugs (btw, Jews were the creators of organized crime related drug dealing in the US (started in the 20's), they professionalized that business, see proof here: archive.is/40enW ; archive.vn/pGEjJ).

Also, let's remember that the ADL was founded to protect a Jewish pedo who tried to put the blame on a Black man for his rape and murder of a female child:
archive.vn/TOKS2 - Tweet: "At his 1913 trial for murder the ADL's Founding Father, Leo Frank, told the court that murder and rape are "negro crimes""
www.youtube.com/watch?v=N0S8NBuAULs - "You Need to Watch This Before History is ERASED | (Leo Frank Trial & the ADL)"
archive.vn/9qdH0 - "Leo Frank: HAVE YOU EVER SMELLED A NEGRO?"

Let's also remember that the ADL receives money from organized crime:
www.youtube.com/watch?v=6a0k0rTmZlw - "PeuDiePie Meets The Mafia - Analysis by E. Michael Jones"
archive.org/details/IsraelmodernKazakhstanThePromisedLandForOrganizedCrime - Video about Jewish and Israeli organized crime

ADL is also indoctrinating the US LEOs to bend to their Jewish supremacist agenda:
archive.vn/KC8ud - ADL's page on "Law Enforcement Trainings"
archive.vn/KpMw0 - FBI page about the indoctrination they receive from the ADL - "A Different Kind of Training: What New Agents Learn from the Holocaust"

Jews make up 4% of all billionaires in the US despite being only 2% of the population - <http://archive.vn/PM42g>
Jews are the most privileged race in the US. 2% of the population, and there is a Jew only prison in NY: <http://archive.vn/JaXpY>
Israel gets 10 MILLION DOLLARS A DAY despite Blacks needing that money for their communities and Israel being a rich country: <https://archive.is/49o1F>
Israel is a racist anti-Black and anti-Christian Country (<http://archive.vn/V7MC> ; <https://youtu.be/tABZckJtLIU>)

On Jewish Females And Their Sex:

Jews are largely ignorant as to fuck and think Jews are white. They aren't. If you know what to look for, you can tell Whites and Jews apart. I have seen a lot of naked bitches on /soc/ and /giff/. I have seen naked Jewish women and naked White women and I can honestly say they are a distinctly different race after years of looking at hips, breasts, asses, faces and public hair curliness. Jewish women are less curvy, more tan, more curly haired, more busty and have a distinct facial feature set of a Levantine or Dinaric nature with big hooked noses and very curved eyebrows. It can't be explained, only seen. Labia of Jewish women doesn't really look different from any other groups' labias other than their outer labia minora may be darker, like Arab pussies. Jewish women are less likely to have an hourglass figure. They look almost White but mixed with Hispanic or Middle Eastern. Some Jewish women are dummy thicc. They have the peach cake. Mischling Jewesses like that of Russia and Ukraine are harder to tell apart from White women, like Maria Ryabushkina or half of the IDF models they have for propaganda. Those types are more skinny but are shaped pretty well. They don't have massive Khazar milkers but still. Jewish women are more religious in their upbringing as they are likely to come from a traditional upbringing with regular synagogue attendance. As a result, a lot of Jewish women, especially left leaning American Jewish women are sexually repressed and hypersexual. They are more likely to do porn, have anal sex, bear the child of a stranger, engage in cuckolding behaviors. Jewish men currently worry about intermarriage because there are so few of them on the planet. There are like 20 million Jews on earth. Jewish men make up a sizeable majority of pornstar actresses, seconded by Hapa (White/Asian) mixed race females. Know your enemy and do not let your enemy bear your children. Do not ever impregnate Jewish females, with the intent to stick around for the child's upbringing, if you are hoping to have a pure White child as a White man, a Hispanic child as a Hispanic man, a Black man seeking a White female, an Asian male seeking a White female or even as a Mulatto male who seeks White women.

A lot of Jewish women lie and say they are White and they will trap you with a Jewish baby and boom, your child has to be circumcised and taken to the Synagogue and brought up their way and in their culture and values. Jewish people also believe you are what the mother is. The One Drop Rule came from them. Partus sequitur ventrem came from them. That said, if the pussy is Jewish, anything that comes out of that pussy when that bitch goes into labor is also Jewish. If you're redpilled and your bitch is Jewish, there is nothing wrong with fucking her. Fuck her, get her pregnant and dump her. Give a fake name and number. If you have an STD like herpes or something that is not HIV, larp as a Jew and go cum inside some Jewish thots. Infect them. This is a war at the cellular level. The less "pure" Jews born from Jewish wombs is another technically mixed-race child and one less Jew. The less attractive a Jewish woman is to a potential big bucks lawyer husband, that is less Jews born. Jews are already a muttet Manson family ethnic collective attempting to interbreed into Whiteness, Blackness, Asianness, Hispanincness, Mixedness - all to pass more easily and infiltrate, then pursue leadership roles in those groups. Jews mixed with all groups so they can have agenter to walk among all non-jewish groups and guide and influence them in a way that will serve Jewish power and not rock the boat. Personally, I will never accept someone like Drake, Naya Rudolph, Lenny Kravitz, Boris Kodjoe or any Afro-Semite as a Mulatto or Blasian's equal.

They are interlopers and they are not Mixed-race. They are Jewish. A person that is over 1/8th Jewish or less is too unstable and has split loyalties to the same people that have enslaved us before in America and wish to push the Kalgéri Plan to enslave Mulattos, Blasians and others. Therefore, anyone half-Black and half-Jewish should be considered Jewish and not Mixed-race. They are not my brothers or sisters. They are the opposition. The only justifiable scenario for a Mulatto man to ejaculate inside a Jewish female's vagina is when she is incapable of conceiving children or has been sterilized. Any female that is 1/8th Jewish or less is breedable by Mulatto men as anything she may give birth to wouldn't even be quantifiable as Jewish anymore and would be absorbed by our hybrid DNA. Furthermore, considering the Jewish role in the Transatlantic Slave Trade and the Kalgéri Plan, Jewish women should be sex slaves in any mulatto ethnostate. Any white nationalists reading this needs to get with me on this subject. I'm amenable to the idea of Jewish female sex slaves as reparations for the One Drop Rule and slavery, provided that you Whites assist us in becoming learned in gynecological health enough to perform sterilizations that leave the uterus behind as well as hysterectomies, disseminate all that you know on female makeup artistry trade secrets and techniques, disseminate all that you know on trade secrets and practices of the tattooing and body modification industry as well as gothic subculture and gothic female dress. Five pale, hooknosed gothic Jewish female sex slaves within the age range of 18 to 21 per mulatto male is a reasonable reparations payment.

Mulatto men should be sexually predatory towards Jewish women during a WHOL scenario and every Jewish woman in a mulatto ethnostate should be fucked by at least 40 men in one week in all three holes. Jewish women should also be fucked by boars and dogs, as well as be made to suck horse cocks when not in use by their superior Novuteran masters. They should be prohibited from cooking meals for any mulattos, especially mulatto males, and should be banned from reading, writing or religion. Jewish women belong on a dick, with an ass gaping wider than HotKinkyJo's or VixenMoon's. Personally, I would unironically marry a Jewish nymphomaniac that could not have children, as well as a White exile coalburner, Hapa female or Castiza female for having quadron kids with if no Mulatto female could be found. Such sterile Jewish fuckmeat is Satan-made and

- On another device, go to bridges.torproject.org.
- Get **Onion** bridges and solve the captcha.
- Copy and paste all the bridges to a text file. Do this two or three times so you have plenty of bridges.
- Boot into Tails.
- Set an Administrator Password and turn MAC Anonymization On.
- Plug in your storage device with your bridges in the text file.
- Move the text file to the Tails desktop through the file manager.
- Open the text file with Text Editor.
- Connect to the internet. Tor Connection will launch automatically.
- Select the "Hide that you are using Tor" option.
- Put one of the bridges in. You should have no issue but in rare occasions, it may fail. Configure your clock and/or pick another bridge.
- When access, you will see this: "Connected to Tor successfully"
- Always tape over your laptop webcam with opaque tape.
- On your Desktop's black top panel, click the triangular down arrow near the battery icon.
- Click the icon of the crossed wrench and screwdriver.
- Go to the Sound tab.
- Mute your audio and microphone.
- Click Security Level: Shield icon in Tor Browser On Tails.
- Select Advanced Security Settings, select Safest.
- Next, click the dust broom icon, click the checkbox and proceed.
- Go to about:preferences in the search bar. You will be on the General tab when you enter Preferences.
- Go to the Privacy & Security Tab.
- Under "Onion Services," select always to prioritize onions services over clearnet.
- Under "History," always use private browsing mode.
- Under "Permissions," click settings, block all new requests for Location, Camera, Microphone, Notifications and Virtual Reality.
- In Autoplay, Block Audio And Videos.
- Under "Deceptive Content and Dangerous Software Protection," click everything on.
- Under "HTTPS-Only Mode," enable HTTPS-only mode in all windows. Onions using http will be fine. This will protect you from http clearnet.
- Next, Go to about:config in the search bar.
- Click yes and proceed to edit the configuration settings.
- Below are the following settings that need to be toggled. Type them in the search bar to pull them up:

- app.normandy.enabled
- app.update.auto
- extensions.pocket.enabled
- Javascript.enabled
- Network.prefetch-next
- Browser.cache.disk.enable
- Browser.send_pings
- Geo.enabled
- Media.peerconnection.enabled
- Browser.safeframe.downloads.remote.enable
- Browser.cache.memory.enable
- Browser.chrome.site_icons
- browser.shell.shortcutFavicons
- Dom.storage.enabled
- Media.autoplay.enabled
- Media.autoplay.allow-muted
- Media.webm.enabled
- Network.websocket.delay-failed-reconnects
- services.sync.prefs.sync.network.cookie.lifetimePolicy
- services.sync.prefs.sync.network.cookie.cookiebehavior
- services.playstation
- Network.cookie.cookiebehavior

- browser.sessionhistory.max_entries
- Network.http.sendRefererHeader
- Browser.display.use document_fonts

- Network.cookie.cookieBehavior
- media.autoplay.default

- network.http.referer.XOriginPolicy

- Cross-reference and check each one to make sure it is configured correctly.
- Click "New Identity" in the browser (The broom icon, next to the shield)
- Go to Panopticlick to check your browser fingerprint. (<https://panopticlick.eff.org/>)

- Do all of this each time you start Tails and first launch the browser after booting up.
- Avoid any scam websites about iPhones for sale, guns for sale, murder for hire, red rooms, hackers for hire, bitcoin tumbling. All that shit is scammers or feds.
- Avoid any and all erotic or pornographic sites. Do not look for any porn on the darknet. This will endanger you and possibly expose you to illegal shit.
- Do not log into your cleartext email or accounts from Tor.
- When you are done browsing, close the browser, disconnect from internet and shut down Tails.
- This will provide you the anonymity you need for sending terroristic threats via one-time emails from DMX, sending videos of executions to the media, as well as filing false FBI tips, DHS tips and NOMEK tips to get a person raided by the feds/the police.

Example of a database entry:

- file names list starting with first observed/oldest name
- file size
- first observed date
- rarity
- checksum of the file (give the file a unique identifying string, that should be unique among all other files, to be able to quickly assess if it was already shared, if it was a variant, etc and to access quickly its detailed information in a database)
- locality assessment
- language assessment
- list of text strings visible
- list of audio words spoken
- metadata container, including
 - date of capture of the data
 - "capture/video taken" dates and hours
 - camera model and ID
- GPS coordinates

Law Enforcement won't care much about the little details but still they most likely grab the full container. Locality and language assessment will be based on metadata as well as visual and audio clues: a book cover in the video, wall illustrations, furniture, makeup and other products' brands, names on tattoos, tattoos, t-shirts promoting regional or local area businesses, signs in a room, labels on equipment, street signs, sounds of bird calls or mating calls from regional animals, sounds of construction, the foliage in the video, traffic signs, license plates, the language being spoken in the video. They can use AI models to get a language and location along with words and texts. Other models will give size and location of skin marks on a body and these will be used in investigations to confirm. If metadata are precise enough to geographically identify the person who created the content, they will transmit the information to local law enforcement contacts, and those will in turn move to build a judiciary case, depending on the "urgency". If the content was created recently, the case is urgent and might be built in a matter of weeks, or even days if the content shows a serious criminal offense. Always remove your metadata from photos and videos you take. Crop out sections of the video that may show footage. Be mindful of anything laying around or in the frame that may give away who you are. Be mindful of any text that appears in the video, and if you are recording at any point you see a person in the video. Script everything you are going to say in advance, like the people giving speeches or doing a YouTube video. International cooperation means pictures, videos and texts are shared between countries for incremental analysis, putting all eyes on you. You record yourself committing a crime on someone else's part you turn, where you speak, and replace it with robotic TTS speech like <https://discord.gg/gtubh3o/say> | <https://github.com/discordian/sam> so that your voice is not in the video to be played on the news like that "down the hill" guy who killed those two ugly ass White girls in the park (<https://www.sundayworld.com/crime/world-crime/killer-of-two-teenage-girls-still-undecided-if-despite-video-and-audio-of-suspect-captured-by-victims-as-he-stalked-them-4198432.html>).

[illegible]

account, upload it to file hosts both on darknet and clearnet, close Tor Browser, disconnect from internet and turn the fucking Tails flash drive off, then format the flash drive and break that shit with pliers and throw it in the fucking trash, with 10+ more flash drives, lined up, ready for Tails to be burned onto it with Balena Etcher so you can rinse and repeat. Avoid manifests and livestreams at all fucking costs. Don't be like Tarrant and throw your life away instantly and only to cuck your country faster than some leftist slut politician could. Operate efficiently, in a decentralized manner, go after infrastructure and high value targets, take photos and video from a camera that isn't live, something that you own and control so you decide when the video is seen and can edit it so you don't get fucking vanned. If you do write anything, change your fucking stylometry.

Summary:

If you ever take a video of yourself killing some politician or fucking some drugged bitch in her ass, you need to be on Linux OS with a fully encrypted LUKS+EXT4 file system with a VeraCrypt hidden volume on it, furthermore, you need to have the latest Tails on a flash drive, with a persistent volume, ready to be thrown out on a moment's notice. Most importantly, anything that can identify you, the area or the person needs to be blurred, cropped out or cut out of the video. Unless the target is someone like Klaus Schwab, Soros, some kike or kike loving politician you're killing for the sake of the video and you're wanting to show you kidnapped and executed those hooknosed goblins, you don't even need to be showing the victim's face in a video because they are doable as well. If you are just fucking some passed out slut, you should blur her fucking face entirely so she can't be recognized. Distort voices, crop and throw filters on videos, trim frames. Don't have a t-shirt from a local restaurant laying on the floor, or on you, or on the target. DO NOT, FOR ANY REASON, PULL WHAT ISIS HAS PULLED. ISIS IS A JEW FUNDED, CIA OP THAT REFUSES TO KILL OR CALL OUT JEWS. DON'T THINK FOR ONE SECOND, YOU CAN HAVE A FULL COLOR, UNCROPPED VIDEO, WITH YOUR UNEDITED VOICE IN IT AND THE FACE OF THE TARGET SHOWING AND IT'S NOT DOABLE. BE FUCKING SMARTER. NO LIVESTREAMS, NO MANIFESTOS. CONTROLLED AND DELAYED RELEASE TO MEDIA VIA DARKNET SWAPS AND ANONYMOUS STORY IDEE SUBMISSIONS. UPLOAD THE VIDEO OVER THE DARKNET AND DISSEMINATE IT OVER DARKNET AND KEEP OPERATING, OVER YEARS. THIS IS MORE EFFECTIVE.

Watch this video before you ever think of writing a manifesto and apply the same OPSEC:

I | H | O | W | | | T | H | E | | |

I | C | I | V | I | L | I | T | | | W | A | R |

I | W | I | L | L | | | S | T | A | R | T |

I'm sick of these faggot civil war threads on /pol/. These ways listed below are the only realistic ways America will finally die.

- National EMP - chaos ensues, country collapses, states begin to fight over who is to rule, civil war begins.
- National Blackout - chaos ensues, states begin to fight over who is to rule, civil war begins.
- National Trucker Strike - chaos ensues, country collapses.
- Asteroid impact on D.C. - succession crisis, chaos ensues, states begin to fight over who is to rule, civil war begins.
- Nuclear blast in D.C. - succession crisis, chaos ensues, states begin to fight over who is to rule, civil war begins.
- Free all the prisoners in the United States to cause chaos that would distract the army and police then airdrop guns and supplies. - martial law declared, civilians, convicts and military kill each other, police and army defect, civil war begins, chaos ensues.
- Russian or Chinese invasion, resistance begins, guerrilla warfare begins, chaos ensues, occupying force is driven out or succeeds, if successful - occupation begins, country transmogrifies, world peace ensues.
- Military fires on civilians, civilians fire back, police and army defect, civil war begins, chaos ensues.
- States disobey federal laws, federal agents attempt to arrest state civilian, state agencies arrest federal agents, federal agents attempt to arrest agents of the state and occupy state agencies under federal occupation, other states activate state police and national guard, intervene, someone pulls a trigger, great blinking occurs, many blocks are spun, convention of states begins, secession ensues, civil war begins, chaos ensues.
- Great Depression 2.0 occurs, economy collapses, people begin assassinating the government kikes, government kikes kill civilians for payback, police and army defect, american troubles ensues which is not the same as civil war.
- Russia invades Ukraine, China invades Taiwan, W4B begins due to NATO being targeted or NATO doing the most, America is dragged into it, W4B ensues, America drafts people to fight for jew shithole Ukraine which is historically and ethnically Russian, people lose shit, resistance ensues, draft dodging arrests ensue, assassinations ensue, civil war ensues, America sues for peace and exits W4B to fight civil war.
- Several politicians are assassinated, some old boomer is red flagged for bants on the comment section cheering for the killers, glowniggers knock on his door to talk, he livestreams and blows them the fuck down, reinforcements come and he is killed, more people rise up and kill feds when they are raided or go to the glownigger field office and McVeigh the place, people are killed in retaliatory attacks, sooner or later, you end up with the Years Of Lead/The Troubles.

In absolutely no other way will a civil war ensue and in that event that none of these catalysts occur, America will slowly rot into Mexico or Brazil over decades and the left will take full power and that will be it. Stop with the faggot maps and the faggot larp about killing blue helmets and having sex slaves. The only thing your cucked, "I live in nomy's basement" ass needs to be doing is stocking up on food and ammo and learning to run 20 miles with a fifty pound bag on, NOW. If you have medical conditions, you need to be going to your doctors regularly. Get whatever surgeries you need to get now while they still see unpureblooded people who don't accept clotschots. Stock up on OTC medicines, buy first aid kits, get atlases and make laminated maps. Fortify your homes if you intend to bug in or pick a rally point to bug out to. If you live outside of Alaska, the non coastal PNW or the South, move to Alaska, the Redoubt or the South. Get the fuck out of the Northeast, the West Coast and the Liberal parts of the Midwest. Stock up on food and medicine, shut the fuck up with larps and this gay "nothing ever happens" shit.

Nothing happens until you fucking make it happen. Furthermore, Americans are too cowardly and weak to do shit, even with guns. Once the food is all gone and the currency is worthless, then you will see real shit, before that, nothing will happen. George Washington and Thomas Jefferson broke the laws of their enemies, Britain, to get America. If you are obeying the laws of your enemies, you are going to be stuck with them forever. This is why hood niggers are more respectable to me than the "right." They do not obey the laws of their enemy. Nigger resists arrest, dies of an overdose, niggers riot, rob you, loot from you, rape you, then get statues made for the nigger out of the melted down statues of your ancestors. White American girl gets raped and killed, Whites let it happen and they do nothing. Whites will either embrace the inner nigger and turn this shit around or be replaced by Jews with something that can, like Medusae or Mollats. More important than that, the founding fathers had money and connections. Weimar America has guns, soldiers and money. You can't go to war with that if you're broke. You need Elon Musk money. No one from /pol/ will do shit but a few based schizos. To the based schizos, don't do it, move to Alaska and make laser rifles or move to a White country. The faggots on /pol/ are not worth getting smoked over. All they will do is make memes of you and call you a psyop. Save my text file and study it.

If you're about starting real shit and participating in a civil war in your country, save this text file and educate yourself. Let the state collapse and let these Communist, Capitalist or Jewish faggots make the first move. Check out of society. Be a NEET. Live on a farm. Buy land. Keep your nose clean and neat likeunderdones. Form neighborhood watch plans. Form small cells. Make propaganda and fashwave in MRP and Inskape to inspire others to do the same. The trick is not to join a national group. No NUP, no Patriot Front, No Oathkeepers, Propterarian Insurgents, Proud Boys, Jewaloo Boys or any of these faggot groups until after a collapse if you are from America and even then, I wouldn't trust it. Meet some anons and meet people you know personally. Cap your cell at like four to five guys. Avoid all social media. Never post your faces on social media. Never have it. Vet them through many months of tests until you've known them IRL a few weeks, never revealing your true intentions for a cell being formed. Infighting must be handled before the cell can be formed. Make sure that you form a homeless group of like 10 and never reveal your full plans the entire time. Time and infighting will split your group. Once you're scaled down, feel out the mood of the group, if you know these dudes IRL and trust them and they appear to be with it, bring them into the fold. If there are no feds or snitches or people in their feelings who will leave the group suddenly, direct the immediate second or third leader personality in your faction to lead his half of the group to operate as a second cell. The trick is to inspire small cell creation. Anything a small cell does can be contained and if one cell falls, another can rise. The copycat effect also works here. If people hear about cells and lone wolves doing a lot of real shit, they will also copy it if you are successful and not getting cucked. Cover yourself from head to toe like this, whenever you operate and never take a phone or smartwatch or anything smarter than a Baofeng radio, Gamin hiking GPS or Eclipse MP3 player from Walmart:

Many people call for and cheer for civil war but don't even understand what it will look like. Furthermore, they don't understand the cost, which is why men with children and wives are pussies and more likely to not want a war. If you can't look at a woman being raped and hear her screams without breaking down and crying or look at your best friend's head after it's been blown open without screaming hysterically, you're not gonna be able to stomach a civil war, let alone a terrorist bombing. Even a leg shot will kill you if you bled out for a good forty minutes without help. During a civil war, refrigeration, antibiotics, surgeons, sterilization chemicals and equipment, electricity and food-supply logistics will immediately go down to Haldowan or African rural village levels of operation. There will be rape, murder, molestation, cannibalism, robberies, arson, general terror and despair. If you take out your local substitution with your dues to stop the government from operating and it causes chaos, does some /r/k/ fag kill his parents and turn his disabled sister's bedroom into a sex dungeon? If the grid is taken out by Antifa, does your grandmother die in the hospital when her life support stops working because someone also hit the hospital with an RF suitcase? How many quadriplegic, comatose and diabetic people die? What if your mother gets knocked unconscious by artillery, goes into a coma and gets put on life support and you wait alongside her, right when some Antifa fags take the grid out? If you shit near a water source and wash your ass, then need to drink water, can you effectively purify the water enough for you to not die of dysentery? If you go out that door with your family or your buddies, are all of you coming back? If you go out that door, is all of you coming back? These are the questions you must reconcile with or block clear out of your mind before any war can happen. War is sweet to the inexperienced.

=====

If you can make a fucking meme or some fashwave for /pol/, you can make propaganda, promoting small cell creation for the purposes of Minecraft multiplayer. With an artistic mind and common sense, you can easily make an insignia for your cell or fashwave representing your group and specifying to form cells or even glorifying cells themselves, as in biological cells with some shit like "out of many, one" as propaganda and to be subliminal about your message. Hell, you could even make fashwave of yourself or two squirrels fucking but that would be cringe as fuck. Before you consider any of this shit, understand a decentralized network in software. Strive to be like that but with your dudes. Be like a decentralized network.

Information On Decentralized Networks:

https://en.wikipedia.org/wiki/Decentralised_system
<https://blockchainengineer.com/centralized-vs-decentralized-vs-distributed-network/>
<https://www.dapp.com/article/what-is-decentralized-technology>

Examples Of Fashwave And Vaporwave:

=====

Evasion & Transport After Killing Politicians And Journalists:

Act Like you are meant to be somewhere, as if you did nothing wrong. Appear law-abiding at all times. When confronted, remain calm and have an actual truthful explanation, along with the malicious one that you do not tell them. Dress like a homeless person, and have a spare bag of clothes stashed in a bush incase you need to disguise after the event. Wear track pants you can rip off and then have shorts + black long Johns on. Learn about wooded areas and homeless camps. Get boiler suits and overalls as well. Prior to taking out the target, embed yourself in a tent camp. Be homeless, make a story and stick to it. When it's time to make your move, you'll have no issues. Having a tent to hide in after the operation in a homeless area could be a effective means of exfiltration. The Christchurch shootings were in my view both ineffective and immoral since they really didn't achieve anything other than helping the New Zealand government gain further control over the populace and harm public relations. I'm for acceleration but how the fuck does this help the right? Whenever someone pops off, nobody even follows through. That's what the fuck is wrong with the right wing. If there were fifty McVeighs a week after OKC, then we would be in Civil War 29 by now. The right is cucked and full of bitches and stupid faggot ass boomers who need to choke to death on a black dick. I hope boomers get their clavicles broken when their zoner grandkids put them in a nursing home staffed by hood niggers hellbent on getting revenge on Massa Y.T. Cracker. The glowiggers know precisely how to get you rock hard for war and they make you edge for months on end, only to deny you the collapse, on some random shit. Incrementalism works because the left is not stupid. Never underestimate the enemy, and, never misinterpret the system. Do not carry a cellphone to any event where you will be beaming, stomping, stabbing or shooting. Use Atlases, Baofengs and hiking GPSes to get around. For interstate travel, use Greyhound because they don't ask much or hop freight trains. If you don't have GPS, a phone will do. You will need a phone in case you fall off a fucking train at 70mph.

Read this first:
https://www.reddit.com/r/vagabond/comments/2z65bb/trainhopping_101_finding_your_train/
>inb4 wehhhhh reddit
Shut the fuck up. Leftists have a monopoly on this info. Put pride aside and swallow that shit. You need this info.
>inb4 you glow
Kill yourself fucking NIGGER

Subscribe to these channels if you have JwTube.
Furthermore, get NewPipe for Android from f-droid.org and download all the videos from these YouTube channels. If you don't have a phone, use ytmp3.cc and select mp4:
- <https://www.youtube.com/channel/UC8QmW2J587wKcZMhw-Ran0r0tA4rAI>
- <https://www.youtube.com/user/braveavempire> - Brave Dave
- <https://www.youtube.com/user/Watsuproducedehi> - TrevorJacob
- <https://www.youtube.com/user/TheHoboShoestring> - Hobo Shoestring
- <https://www.youtube.com/channel/UCpW4pXfJ2a2SSfJ8nVw-shiey>
- <https://www.youtube.com/channel/UCdLn3p2Q8F6895ng9A> - Jumping Off The Cliff
- <https://www.youtube.com/user/Telestations> - Telestations

One can not just start freighthopping. You will need the following:
- Experience from a freighthopper
- Patience
- Water
- A watch that is LCD and isn't a fucking fitbit/smartwatch/fedtraceware
- A helmet
- Common sense
- The ability to infiltrate a leftist circle without revealing yourself
- A baofeng UV-SR radio or Uniden radio
- A handheld hiking GPS (I recommend the Magellan Triton)
- A solar powerbank with a Tracfone and prepaid 4G LTE data. Freighthopping is the one time having a phone is acceptable.
Get a PDF reader app for the train symbols PDFs I may include later. I recommend MUPDF.
- Other stuff too but this is basic info. Do your own research.

Make an account on squattheplanet.com. Join their discord.
Join the r/vagabond and r/trainhopping subreddits and make threads like:
- "new to trainhopping, can you explain this to me"
- "im in *fake location*, how do I start hopping"
And go from there.

Go to this thread on Reddit: https://www.reddit.com/r/vagabond/comments/4ibnj0/the_vagabond_bible_the_ultimate_download_for/
Read this: <https://squattheplanet.com/threads/what-do-you-consider-the-gold-standard-pack-for-train-hopping-or-just-general-all-around-use.35778/>

Furthermore, buy a copy of this fucking book:
<https://squattheplanet.com/book/> - The Anarchist's Guide To Travel
<https://www.amazon.com/Anarchists-Travel-Matthew-Nicholas-Derrick/dp/099912028X>

And save all these to PDF or print out the Intermodal Sections of all of these:

<https://youtu.be/5v5pH4h6s> - Thieves Rob Cargo Train of Retail Packages and COVID Tests
<https://youtu.be/9Kt9tJ8-nM> - Train stolen, taken on 10-mile joyride, officials say

Notes:
Each freight train has various types of cars, each car has a number and they are tracked by GPS and operations all over the USA. The only people who actually know the contents of each car are the people in the Operations center. The actual train conductor, yard bulls or engineers do not know what's in each car, they only know the number of the car and if it has hazmat, anything that is combustible or flammable. So in order for someone to know a car has guns it has to be an inside job from someone in Operations, you'd have to have access to the shipping manifest and be able to identify the exact car. CSx Q542 Military Freight Train 99 Cars With Explosives and Spirit of Ravensia unit manufacturer - they know about it and it's insured. Also, the train company (BNSF, Union Pacific, etc.) only gets paid if it's delivered but they have insurance for that also but a investigation must take place. There are three towns most Chicagans go to buy guns. Hammond, Gary & East Chicago, all located in the state of Indiana. Since Chicago & part of the south suburbs sit on the Illinois/Indiana border, it makes getting guns easier. Indiana gun laws are not strict. CSX does not ship any weapons like that in a mixed freight unless they were tanks and other fighting vehicles. If it were a military item, there would be CSX police along with local police and most likely the item would be better covered on the sides for better protection, it would also have a GPS on the car. The on duty CSX officer will call the next patrol unit down the line and advise that the train is now in their sector as the train proceeds along its route. Any guns would be in a crate in a boxcar or an intermodal.

Miscellaneous Notes:
- If you even attempt to hop on a train full of military equipment, dozens of soldiers with guns will pull you off of it.

- ////////////////////////////////////

E	V	A	S	I	O	N
/	/	/	/	/	/	/

1. Know where the target is/the route they will be taking.
2. Be able to find a appropriate vantagepoint to set up a ranged position.
3. Having a clear line of sight and the training to perform
4. Having a thorough escape plan for every contingency. Ideally you would want to be able to pick up the weapon and other equipment into a briefcase and exfiltrate the area with no loss of equipment. However if you had the funds simply leave your equipment and book it as fast as you can that may potentially be better. You need to have a good idea where all the cameras are in your city. Luckily today you can go anywhere with glasses, a non-descript hoodie and a mask on and go anywhere anonymously. Study information theory, if you know how government investigators track down criminals you can learn how to prepare the necessary counter measures to ensure you can escape to safety. Lots of cameras nowadays track you by your gait, phone or ID. Leave that shit at home and smack yourself in the leg with a hammer so you have a limp. If you want to, practice and fake a fucking limp.

Cellphones and fitbits can be traced. They have IMEIs and device IDs. This kind of shit like Arduino IoT boards can't be traced but if your target is smart, they can detect the fuckery going on with their shit. Unless you went after a paranoid black hat hacker on Day Of The Rope, you should be okay.

F	U	C	K	E	R	Y

The vulnerable points on a transformer are ceramic bushings, the oil conservator tanks and the iron core, wrapped in miles of spaghetti-like copper wire. Ceramic bushings are insulators. They are also pressurized. Shooting them will cause an explosion with shrapnel. Perforation of a oil conservator tank or shooting out the fans will cause a transformer to immediately overheat. That is the danger of the transformer. So, it is the transformer that you should shoot. It is the transformer that has the most copper wire wound around it. It is the transformer that has the most time to hit the grid is the summer when the grid is at its absolute strain in at least 80°F. The best time to hit the grid is at night between 11pm to 2am. The cops will be tired and there will be a shift change around 3 - 4am. You want tired hungry cops. Not freshly awake cops who just ate. Mylar foil balloons cause power shortages. You can use these to your advantage.

https://en.wikipedia.org/wiki/Metcalf_sniper_attack

- They did not build several spag transmitters to jam the radios the crew at the substitution used to communicate.
- They did not kill the on-site crewmen. You want Blackout? Kill the people paid to stop one when you go to shoot the place up.
- They did not suppress their rifles to confuse concerned people in the area as to the direction of the gunshots.
- They did not bring a jammer that would jam radio and cell service because the crewmen could have still called 911.
- They did not use the Poly/Ether/Ethernet (PEE) system to bomb threat on a airport or hospital.
- They fired indiscriminately from a vantage point with AK-47s.
- They did not release a bunch of mylar balloons to short circuit everything and then take shots at key parts of every transformer.

- Metzalf was done horribly fucking wrong. They should have cut cell towers as well as that area's underground phone lines. They should have jammed broadband radio.
- They should have aimed at the bushings/insulators, the tanks, the breathers, the center mass of the transformer.
- PG&E was able to radio out so power was redirected.
- People were able to call 911 so police interrupted the attack.
- Crewmen were not killed so they were able to call for help.
- The only good thing they did was using flashlights for subvocal communication and cutting the underground landline phone lines before the attack.

.....

And lastly, the vulnerable points on a transformer are:

- The Oil Conservator Tank
- Ceramic Bushings
- Core Winding
- Silica Gel Breathers

You shoot these with a scoped rifle at 2 story level elevation with cover from bushing shrapnel. Do not fire indiscriminately from a spider hole and leave 100+ shells on the ground.

- If you cut down a pylon, you will remove a pylon from a long line of pylons from the substations to the cities. There will be some consequences of this. You will not end every light in existence, nor will you bring down a whole part of your state. One thing is for certain: It will take weeks to repair and your city will be blacked out for a while. They will have to go make a new pylon, turn off the local grid, go install the pylon with cranes and bolt it to the ground, connect it to the others with cables and turn that area's part of the grid back on. Not to mention, millions of dollars in damages.
- "Sawall" blades are those bimetallic carbon-steel blades that you can saw through steel with.
- "Diablo" bimetallic blades are the best for cutting the type of steel found on pylons.

Weapons That Can Provide An Edge In 2021, The 21st And The 22nd Century:

- Infrared Blinding Lasers That Look Like Journalist Video Cameras For News Broadcasts To Get Close To High Value Targets.
- Lofentamil-DM50 Spraying Drones.
- Dimethylmercury Spraying Drones.
- Flamethrower Drones.
- Tarricha granulosa tetratoxin bacteria culture.
- Raspberry Pi face tracking turret with multi-watt blinding laser.
- 4-Fluoro substituted on the phenethyl ring 3R,4S,4S-ohmfentanyl-DM50-EDTA.
- 8-bromo-4-(2-aminopropyl)benzodifuran.
- Panic Gas (Aerosolized LSD infused with Adrenaline).
- Tetramethyl Orthosilicate Spraying Drones.
- Lofentamil-DM50 Sprinkler System.
- Tetramethyl Orthosilicate Sprinkler System.
- Dimethylmercury Sprinkler System.
- Thallomide Spray To Cause Birth Defects In An Enemy Race/Nation/Population.
- Metal Casing Splash Bombs That Rupture On Impact, Releasing Hundreds Of Gallons of A Liquid Agent.
- Hot Lye Spraying Drones.
- Polonium Alloy Frangible Bullets.
- Multi-Watt 800nm Laser Array, Encased in an opaque glass siren that allows infrared light to pass through, capable of spinning at 2,000+ RPM with a 180 degree radius area of effect.
- 7 Watt 808nm Blinding Laser Drones.
- Infrasonud Parametric Speaker Rifle with 5 Watt, 445nm Blue Laser Diode Integrated Within For Blinding
- Gauss Rifles.
- Railguns.
- Tungsten Carbide Kinetic Bombardment Rods From An Orbital Strike Platform.
- Flourine Gas Grenades That Ignite Lithium Ion Cells.
- Parametric Speaker Drones That Emit Infrasonud.
- 5-MeO-DHT-DM50 Spraying Drones or 5-MeO-DHT Gas Grenades Made From Bufo Alvarius Extract.
- Datura "Tranquillizer" Barts.
- Datura Gas.
- Scopolomine Dust "Pepper Balls."
- Sulfuric Acid Glass Tanks Containing One Liter Of Sulfuric Acid That Ruptures On Targets.
- Wax Shells (Noxious Shells) - Naphthalene/Potassium Nitrate/Sugar/American-241 Pellet Smoke Grenades.
- Liquid Radium Vial Bullets that cause a motherfucker's jaw to rot and fall off.
- Trencher Bullets - 12ga or 10ga Sabot Slugs that rip out excess internal tissue and bone, leaving a ten inch wide trench in a motherfucker's chest.
- Corium Alloy Bullets, made from corium extracted from Chernobyl or Fukushima.
- Fentanyl Gas From The Chechen Hostage Crisis Theater Situation In Russia.

How To Burn Right (Area Denial/AMD):

- Directed Energy is the best way to burn a forest.
- It is no secret Antifa is burning the West Coast. Don't play dumb, they know, I know, you know.
- Antifa uses butane, kerosene, gas, etc, accelerants.
- Accelerant can be detected in arson investigations and you don't want that.
- Using fireworks like Antifa did is also stupid because pieces of the fireworks remain, as EVIDENCE.
- To burn like a pro, get a magnifying glass and go to the woods on a sunny day. Magnify a ray of sunlight until you ignite brush, bark or a pile of dead leaves. Once you have your fire, get the FUCK out.
- Another way to burn like a professional is to use a seven watt, blue laser pointer. Pile up a bunch of leaves and a piece of paper and focus the beam to a small point. Burn a black piece of construction paper or a dark leaf to get it going.

How To Burn Right (Insurgency/Urban):

- Make Molotov Cocktails with 1/3 motor oil and 2/3 gasoLine. Soak the rags in gas and let them dry. Some gas will evaporate but the rags will be more flammable.
- Use a brown or green thin glass beer bottle.
- Make sure you plug up the bottle right so the fuel doesn't pour out on you and cause you to do the Antifa Shuffle.
- Throw the fucking bottle forward in a right side up position.

How To Make Self-Igniting Molotovs:

- <https://youtube.com/watch?v=OU-odCVdglY>

Eye Raping:

This is my favorite section and my favorite weapon, the blinding, burning, seven watt infrared laser pointer. Humans can not see infrared. So, when you are looking at a spot pointed at by infrared lasers you will see a faint violet dot and then come to realize you can no longer see the color red, forever. Directly looking at a infrared laser beam without laser safety goggles will pop your fucking retinas and fry your optic nerves before you realize what is happening to you. No world leader on Earth has laser safety goggles on, 24/7. No one anticipates being blinded by infrared lasers. It is not conventional at all so it isn't planned for. But make no mistake, infrared lasers are here and you can use them on your enemies.
Antifa adopted lasers because Hong Kong protestors used lasers. The cat is out the bag. Expect lasers to become used more often until some Jew cuckservative politician faggot tries to ban them. Antifa, for the most part, uses cheap green lasers (532nm wavelength) and medium to high quality blue lasers (445nm - 450nm wavelength)

Notes:

- ALWAYS WEAR EAGLE PAIR 190-540nm 006 GOGGLES WHEN HANDLING A SANWU 7 WATT 445nm LASER!
- A SEVEN WATT 445nm LASER WILL INSTANTLY HARM YOU IF HELD IN YOUR EYES AND PERMANENTLY BLIND YOU IRREVERSIBLY AT LESS THAN 8 FEET AWAY!
- If you hold a seven watt laser into some fuck's eyes for one minute straight like three inches from the face, they're fucked forever. Not even Neuralink could help them.
- YOU NEED A CO2 LASER IN THE 80M RANGE FOR GUARANTEED INSTANT EYE EXPLOSIONS/EYE SLICING
- ALWAYS GET THE RIGHT WAVELENGTH GOGGLES FOR YOUR LASER - 190-540nm goggles for 445nm, 880-1700nm for 888, 980, 1064 and 1700nm, 10600nm for 10600nm lasers.

Lasers, Laser Safety Equipment, Criminal Intent, Unlawful Assembly & You

There are three types of people who interact with lasers at a riot, event, plot, etc.

- People in imminent danger of permanent blindness
- People using a laser to put people in imminent danger of permanent blindness
- People standing next to or around people using a laser to put people in imminent danger of permanent blindness

When you go to a riot, someone will have a laser. There is always one laser guy in the vicinity with some cheap ass eBay glasses on or maybe they are so fucking dumb they have none. Maybe you are so dumb, you have none. The first step to never going blind in a riot, due to lasers, is to stay the fuck at home. The next step to not going blind is to get laser safety goggles for the Green and Blue wavelengths. Any good pair of 190-540nm laser safety goggles with an optical density of at least 5 will be sufficient enough to protect you. Only a highly intelligent, malicious and calculating individual would bring a 808nm/980nm/etc infrared laser to a riot. They are harder to find and will take months to reach you if you order one as they will likely come from China after being custom built and shipped off. You never have to really worry about a high powered infrared laser at a riot. You will see three different types of lasers for the most part at a riot. Red, Red, Green or Blue. Green and Blue being the most practical, Green being the most common and Blue being the most powerful. Antifa motherfuckers were never smart. A bunch of dumb, self-hating white quill-bourning twinstaritarian faggots overthrowing the Republic Of Starbucks isn't exactly the paragon of laser safety. You see them on groups like Richmond Rebellion, talking about light mage this and light mage that. A light mage is the designated laser person at a protest. And of course, none of these fucking idiots use laser safety protocols or eye protection. Antifa is full of cowards that cease when slapped so this is why they sling 100mw eBay lasers around to permanently blind people. You have to be mindful that at any protest, one of these faggots is likely in possession of a \$9 laser from Wish or Alibaba or eBay, classed as a <1mw laser to be sold legally and some cheap ass glasses that don't protect worth a fuck and is pretty much the equivalent of playing Russian Roulette with your eyes.

The first step you need to take before you get involved with a laser is to make an account on a hobbyist laser forum and/or go to a repository of laser knowledge and get educated.

- <https://laserpointerforums.com/> - Laser Pointer Forums
- <https://www.laserpointersafety.com/> - Laser Pointer Safety
- <https://www.candlepowerforums.com/vb/forum.php> - Candle Power Forums
- <https://www.osha.gov/laser-hazards> - OSHA Laser Safety
- https://en.wikipedia.org/wiki/Laser_safety - Laser Safety, Wikipedia

An ounce of prevention is worth a pound of cure. Once you have studied enough to where you can remember this information, go on YouTube, to these YouTube channels and learn more about laser safety:

- <https://www.youtube.com/playlist?list=PL0yLASZVLzhjv98dy4sIFRUSUf-3Uwj> - M960
- https://www.youtube.com/channel/UCz_KwID815gUeIafAdrag - ideLieverdit/Laseranon
- <https://www.youtube.com/channel/UCYJgJ7rzs0vDR7figjuIA> - Styropyro
- <https://www.youtube.com/user/AnselmoFanZero> - LaserGadgets

- <https://laserpointerforums.com/threads/get-some-safety-goggles-now.75799/>
- <https://laserpointerforums.com/threads/irreversible-vision-damage-dont-turn-a-blind-eye-to-laser-hazards.71299/>

Before you obtain any laser, you will need laser safety goggles. But before you look into that, watch this video:

- <https://youtu.be/WbDjIDhXMs>

Survival Laser is a highly respected and recommended storefront for laser safety goggles. You can trust their stuff.

https://www.survivalaserusa.com/Safety_Goggles/cat1667093_1527285.aspx - USA buyers go here
https://www.survivalaser.com/Safety_Goggles/cat556889_826128.aspx - None USA buyers go here

These goggles will protect you from Red, Green and Blue Lasers, commonly found in political riots:

- Eagle Pair® 190-540nm + 610-760nm DUAL BANDWIDTH Laser Safety Goggles
- Eagle Pair® COMBO 190-540nm & 580-760nm Laser Safety Goggles (WEAR BOTH)
- Eagle Pair® 190-540nm & 800-760nm Laser Safety Goggles (DOES NOT PROTECT AGAINST RED)
- Eagle Pair® 190-540nm OD6 Standard Laser Safety Goggles (DOES NOT PROTECT AGAINST RED)
- Eagle Pair® 190-400nm & 580-760nm Laser Safety Goggles (DOES NOT PROTECT AGAINST 405NM+ BLUE OR 532NM GREEN)

Collect any and all brass casings. No shell left behind. Always use brass catchers or revolvers. ShotSpotter is in a lot of places and will detect suppressed shots. Suppressed shots are as loud as a plane in the air. The best time to shoot is July 4th when ShotSpotter is strained by fireworks. The second best time to shoot is 11:59pm, December 31st. New Years Eve. Several people will be shooting so this is good aural cover. Use shotguns, due to lack of ballistics. Use subsonic ammunition in a suppressed gun for minimal report. Use Frangible ammunition always if you can. No slug, no ballistics. 5.7x28mm is the best caliber for this. Replace your barrels, your ejectors, extractors and firing pins. Ballistics can trace a non frangible bullet to your barrel through bullet striations and ejector/extractor markings on the casing, as well as the primer. If you buy a bunch of brass, you can use it to file out barrels used in shootings. With the rasp, scrape the shit out of the inside of the used barrel. This will further fuck with the ballistics of the gun, making a match harder. One night, without taking any electronic devices, toss your scrapped barrel into a river. If you fire a gun, go shower once you can to clean off nitrates and wash your clothes also. Get a black colored gun like a Glock. Silver and custom colors shine at night. Get a lightweight polymer gun. So, Glock, Kel-Tec etc. Do not bring ANY electronic devices smarter than a Casio wristwatch because smart watches, Fitbits, smartphones can all be traced. Do not bring anything with GPS, Bluetooth or Wifi. Do not drive any fucking smart cars with OnStar or SiriusXM. Get an old ass vehicle. They can and will track you and with OnStar, they can turn your car off in a high speed chase. Motorcycles, ATVs, old vehicles, bikes only. Have no witness or accomplice. Never bring someone else in on your work. Do not kill someone you know or in your area, not even a local politician you hate. Well, maybe a mayor but not local politicians. Too specific. The idea is to have no connections. So regional journalists, politicians, etc. If you really wanted to fuck with people, buy a bunch of range brass and just dump shells at the scene so it throws off the initial investigation. However, this is doing the most when it is not necessary. Just always collect your shells, you'll have no issues.

It is illegal to own a gun with a filed off serial number:

- <https://www.atf.gov/file/4881/download>

Not that legality matters if you are reading this but I assure you, you will care about this part:

- https://www.reddit.com/r/betterCallSaul/comments/cfUG6t/filing_off_the_serial_numbers_on_firearms/

- <https://youtu.be/04Hm4P92k>

If you are caught with a dirty gun, you will pay for every crime that gun was used in, whether you did it or not. If you came into possession of a stolen gun, even if it has no bodies on it, you will go to jail for an illegally obtained firearm. A privately sold firearm would have a bill of sale or some means to prove transfer of ownership, even an ArmsList correspondence. A stolen gun will have its serial on file with the police so when they catch you with it, you're getting charged. The best position for you to be in, assuming you are not a felon or someone not

allowed to have a gun, is to have a clean gun. A clean gun would be a gun that is neither stolen, nor has any bodies on it. As a person allowed to own a gun, you having a clean gun is your legal right. As a felon or someone not allowed to own a firearm, your course of action is to obtain something that is not legally seen as a firearm. Like crossbows, knives, bows, airguns and black-powder, nitro fire, cap-and-ball revolvers, pistols and rifles. If you want to own a gun and intend to use it for legal reasons, you will have to go through a background check, go on file with the ATF, pay taxes, the fingerprints, etc. It's not worth the hassle to be honest. A trackable smart gun, with microstamping, some type of RFID smart bullet and a serial number deep in every part of the gun would be a good way to make gun theft harder and make gun homicides easier to counteract. But, this will never happen and nor should it. The best gun for a person to have in any circumstance, is a ghost gun. You should never have a gun with a filed out serial number or bought off the streets. Get a Polymer80 receiver or in the case of an AR-15, a 80% Lower. You want a ghost receiver with no serials.

Here are some tutorials on how you can regularly change these parts:

How To Change The Barrel, Firing Pin, Ejector And Extractor On A Glock

Notes:

- You need a cylindrical thin diamond rasp to file out the inside of old gun barrels to fuck with the rifling and the ballistics when you are ready to dispose of the barrel. Ballistics involve shooting a round out of a gun in evidence to compare the undamaged bullet to the bullet fired from the scene of a crime. If that bullet matches their damaged slug they pulled out of someone's face or some wall of a grocery store that was robbed, you're fucked. Don't be fucked. Destroy the evidence and dispose of it.
- You won't get a ghost 1911 Frame unless you work for Solid Concepts probably.
- Always use brass catchers and use gloves at all times you are shooting.
- Always toss your scraped old barrels in a large body of water so rust and water based erosion can also occur to the old barrel.
- Always melt your shells cast brass darts and sell them to some recycling plant or on eBay.
- To my limited understanding, I think a drop-in 1911 barrel is the best. I may be wrong.
- Some 1911s are different so it's not universal. You should always look up your specific gun on YouTube for tutorials.
- If you toss a gun or gun part in the waters near you, you will have to deal with magnet fishing jews.
- A magnet fisher is worse than a nigger or Jew if you are reading this with intent for use.
- Always shower after shooting and wipe leather gloves with wet wipes. All other gloves must be washed.
- Even with suppressors, you need ear protection.
- Good luck, I wish you success.
- I have never handled a gun before so I can't confirm this information at all but I have asked a lot of people, read a lot of /po/ and /k/ threads, have common sense and a high IQ. All I can tell you about this section of the text file is I did my homework well, over years. It's real and exactly what you need to know. If you collab it, I will give you the tips listed herein, you will have the desired effect with no problems.
- Unless you work in a steel foundry, you're not melting guns down and you can do it in a foundry to my knowledge so you have to toss parts in water.
- I hope that all these kike politicians and journalists become cold cases on a fucking slab with no suspects.
- I want the Alexandria, Quantico, Langley, Fairfax, DC and Bethesda murder clearance rates to go to fucking 0%.
- Death to the groomiggers and rape for their mothers, wives and daughters.
- Death to the Jews.
- Death to America.
- Don't target civilians. Stop this faggot mess shooting shit and stop shooting the little guy. A weed man, store clerk or employer has no power. Some bitch who won't fuck you or some kid in your class is not worth a bullet. KILL ELITES AND KIKES ONLY.
- I hope you MK-ULTRA, glowing mess shooter faggots "plotting" i.e. rehearsing your script on your boss or classmates read this. Stop fucking killing people with no power and go after the kikes and the feds. Why the fuck is there never a mass shooting at the Pentagon or at the City Hall? It is it ALWAYS a fucking school, mall or concert. Not one of these false flag mess faggots will go to a synagogue. Not one shooting at the FBI field office. You can tell a real one from a false flag staged event. A real event is blown way out of proportion and they never let it go or it is memoryholed. Timothy McVeigh is my hero. A real one about some real shit. Rest in peace.
- I hope even the Crips, Bloods, Hoovers, GIs, BIs, Vice Lords, Latin Kings, Mortenos, Surenos, MS-13, Black P-Stones and all other cliques start coming together to kill their local FBI field agents and all D.C. congressmen and senators.
- Free Jackie Arklov, Free Tyler Barris, Free Mr. Bond, Free Brenton Tarrant, Free Larry Hoover, Free Ted Kaczynski.

Tips On Bombing From The Failures Of Mark Antony Conditt & The Unabomber:

- Never put on a disguise and take a bomb into a location. That is stupid.
- Never bring your cellphone with you when you're going to plant a bomb.
- Never order bomb components on Amazon.
- If you order bomb components online, use a VPN and a drop address.
- Never drive a smart car.
- Never buy parts from a hardware store near your house.
- Never buy parts multiple times.
- Wait at least six months before building something after buying parts.
- Never, NEVER, write a fucking manifesto. STOP DOING THAT SHIT.
- Test your shit in the woods somewhere before you actually do a bomb project.
- Pick random times.
- Do not develop a fucking routine.
- Do not build a bomb in your house.
- Do not keep bomb components in your house. Get a fucking cabin or a trailer. Rent a fucking cabin. Buy a shed and put it in the woods somewhere 50 miles from your house.
- Don't develop patterns.
- Don't bomb back to back. Space it out. Take breaks. Change MDs. Move differently.
- Do not try to use a package service, deliver your shit yourself.
- COVER UP FROM HEAD TO TOE, CONCEAL YOUR ETHNICITY AND SEX!

The Best Shotgun Rounds For Warfare Between Humans

- #5 Turkey Shot
- Sabot Slugs
- Dragon's Breath Rounds
- 00 Buckshot

If You Are Trying To Assassinate A Governor:

State capitals are public property, there is no dress requirement, but, dress professional like you belong there. History, curiosity, a desire to watch the legislative process, a want to speak with your legislator - All of these are valid excuses for being at a state capitol. The governor walks out, normally through a non-public doorman and/or into the garage directly. They are transported by his personal security detail. They do not wear laser safety goggles or body armor. It is very possible to get near governors at public events. Governors have daily/weekly/monthly agendas and many events are announced publicly to a Governor's calendar. State Police Executive Protection details do wear body-armor, typically level IIIA plates, on the front, sides and back. If you assassinate a governor, you stand to face life without parole. You will benefit from having a high powered laser but you can not get into a state capital building. Mayors can be taken out with a blinding laser at the mayor's office. Leave the cellphone at home, wear a dark hoodie and a mask. Have a change of clothes nearby in an area without cameras.

Killing Politicians:

- President, VP, and Speaker Of The House and their families have Secret Service protection 100% of the time as they are #1, #2 & #3 in line for the presidency.
- People like Supreme Court Justices, Senators, Congresspeople can have Secret Service protection if/when there is reason for them to have it, when there are credible threats to justify them having this but they do not have Secret Service protection all of the time, or even much of the time normally.
- Congresspeople and Senators, when they're within their home state for example, are often accompanied by a couple of State Police officers when they're in the state, and out and about in public at events, gatherings or town-halls.
- Ambassadors, Embassy Dignitaries and the Like, are protected by the Diplomatic Security Services.
- Federal attorney general, Assistant Attorney Generals are protected by the FBI but other federal agencies can/do assist when credible threats arise.
- Governors are protected by their State police, and/or a special Capitol Police Detail. These outfits operate much like the Secret Service do, but only within the state, as their states law enforcement is responsible for their protection.
- The states legislature will be protected by the State Police in that state, or whoever the individual state holds responsible for their security.
- States Attorneys (within the state) would also fall under the State Police protection.
- States have also been known to hire out to private security outfits as escorts to protect their representatives when the need arises.
- There have been congressmen and senators out in their home state/town without obvious security personnel at their side but that's no guarantee that none were present.
- Non-White, Democratic senators and Congresspeople are less likely to have a personal security detail during re-election campaigns in their home state.
- For federal elected officials, stick with Congresspeople, Senators and below as softer targets when congress is not in session and they're in their home states.
- In the States, pretty much anyone below Governor, again, when their legislatures are not in session is when they're more relaxed for the most part.
- Dox them via voter registration. All politicians are registered to vote and do vote for themselves.

Network Weaponry:

Melee is the worst to go. You never want to beat or stab anyone. It's too intimate. I want to make it painfully clear that you need to be clean and you need to be quiet. Crossbows and breakshot nitrogens big-bore airguns can easily do the fuckers without much blood, DNA or ShotSpotter. Get this gun: <https://www.airgundepot.com/hatsan-mod-130s-vortex-qe-air-rifle.html> Or this gun: <https://www.amazon.com/Benjamin-Trail-Air-Rifle-rifle/dp/B000BEB1NY> Or this one: <https://www.airgundepot.com/san-yang-dragon-claw-air-rifle.html> Or this bow: <https://www.cabelas.com/shop/en/ravin-crossbows-r29-crossbow-package> See below.

How To Assassinate Any (Western) World Leader (And Likely Kill Yourself 100% Immediately):

You Will Need:

- Big Balls
- A Death Wish
- Food And Snacks At Your Safehouses (Preferably A Public Cabin)
- Twelve pairs of the orange Eagle Pair 190-540mm 006 Laser Safety Goggles
- Eleven People You Trust
- Six 7 Watt 445nm Samu Lasers
- Six AR-15s and 9 30 Round Mags Per Man
- All Frangible Ammo
- Brass Catchers For Each Gun And a Man With a Big Bag For Shell Dumps
- Level UV Helmets And Vests.
- Laser Safety Knowledge
- A Bag Of Screws
- U.S. Army Marksman Shooting Experience
- Spark Gap Transmitters or Broadband Radio Jammers (Jams police and security radio communication so they can't coordinate or respond)
- Some Wi-Fi/CPU/GSM/LTE Jammers (Jams Live Feeds from Journalists and Civilians, prevents calling for help)
- Combat clothes, from head to toe, black/leaves, all the way down to the Boots need to be black or uniform. You came to blow not to larp as Power Rangers. Black/Green/Navy Blue. Pay cash.
- Gas/Styrofoam Napalm

Unwritten - Turn your jammers on before you get there. Test your vehicles and fuel them. And no, don't pull up to the gas station during the event. Leave all phones/technology at home. Bring nothing smarter than a AA battery powered device.

- Put on your laser goggles and do not remove them for any fucking reason. You will see blue specks in your vision of it is daytime. This is color polarization. You will be fine. Obviously do not stare or look at the Sun. They're laser glasses, not solar glasses. Don't be dumb.
- Steal cars for getaway and steal cars for fleeing. You need four. All old 1980s/1990s cars. Go to the event with your dudes. Put on the equipment but be mindful you will be shot in the fucking face so it won't matter.
- Watch the live summit or G7 or whatever the fuck and wait for the time the reporters and world leaders are on the tarmac. Pick one person and stick with it in advance.
- The world leader is worthless and a puppet. World leaders don't have guns. So they are meaningless. You want the security detail. Focus on them. The people with the most power on Earth are the people who protect the world leader, not the world leader themselves.
- Blind the security detail and shoot them first. You will have to neutralize the people who will kill you first before the target. Switch mags and empty brass catchers in the shell bag. Leave nothing behind for forensics.
- Be aware world leaders have bulletproof suits. You will have to headshot them and blow at least six in their shirt. But they will be running so shoot them in the back to stop them. It'll be like being beat with hammers for them, they will drop.
- Throw screws in the turbines of their planes so they can not take off. Put some dudes on it. Shoot the engines if you must. Stop the possibility of a takeoff.
- Make sure that truck with the stairs to the world leaders plane is not there because agents will still be in the plane waiting to rush you. Have a guy move it if possible. If not, put a "Light mage"/Laser beam nigga on it.
- Fire the scene and get to your rally point outside the city where your second group of cars are. Torch your cars that you fled the assassination in.
- Go to some safehouses and remain for a week.
- Get outside the country afterwards for separate destinations.
- Unless you are smart, you will be caught because that will be immediately investigated.

Notes:

If the world leader jumps into the armored car, don't worry. They don't have laser safety glass for windows or opaque, solid metal doors with cameras and screens. You can easily blind them and the driver through the car windows. If you can see into the car, you can laser into the car. If you have thermite and gas/styrofoam napalm, you can burn the armored car to the point they jump out. If you can't get them out, turn their strength into a weakness. Ram their armored car or tow it into water. Drown them. Alternatively, throw some sugar in the tank so the car shuts the engine and cuts out. Put cannon fuse in the gas tank and light that motherfucker. Burn them. Only the U.S.A. has Secret Service. Other countries have security but not like that. If you can egg Macron, you can pop his ass. This is why European gun ownership is highly restricted. But, back to reality here. Pass the John Wick Part 3 movie you're seeing in your head, starting you. Heads of state are almost impossible to assassinate. For starters, you would have to act alone. Any kind of conspiracy would be discovered, because the federal government is set up to stop such kind of thing. Look at it this way, there are thousands upon thousands of people looking to commit acts of terror on US soil. And yet, it almost never happens, because the government monitors all communication, infiltrates suspicious groups, tracks sales of weapons, money transfers, etc. Killing a world leader would be a thousand times harder than blowing up a random group of people at Walmart. So how would you purchase the equipment you need? How would you develop the skills to use it? How would you pay for it all? How would you store it without anyone noticing anything. How would you practice using it? And, if you manage all that, would you be willing to lay down your life once the deed is done? Because even in the highly unlikely event that you succeed, it is 100% impossible to get away with it. Surveillance is everywhere and in this case they will hunt you down. There are tons of people who have started plans to assassinate their leaders. But they ended up in prison, or worse, before getting very far. They got caught with an illegal weapon, or they got ripped off by the criminals they were trying to buy stuff from. End of story. No one even knows what they wanted the stuff for because they were killed by some niggers and robbed or shut their mouths and took the weapons charges to avoid more time. But other, less protected politicians are attacked all the time. Assassination is seen as an extreme reaction, reserved only for the harshest reprisal and feeling wronged on a very personal level. Beyond that, perhaps people just believe that these people should be arrested and imprisoned. Most people are peaceful faggots. Appose them and they're content. Piss them off and they'll only rant on Facebook. Most people just wanna grill. Remember, assassination is taking the rules into your own hands and being judge, jury and executioner. Are people ready for that? Even if you assassinate them, it does not mean that their viewpoint will be assassinated. It can even make them a martyr. They need to be fought and disproven out in the open. It is an information war. Most normie boomer faggots get distracted by work and other various things to the point where anyone who even seriously considers it will be ostracized from society and, the guy who bants too hard will get a knock on his door. Along with that, politicians and world leaders are often accompanied by a whole security force in public, any of which would take a bullet for the politician/leader simply because it's their job, and unless you're psychotic, even if you have absolute hatred and a grudge for a guy, you'll still probably regret taking the life of a person. Also, security is so tight around such figures that they often have drones and aircraft flying above them equipped with such powerful cameras they can see handwriting on documents someone has in their hands from that high up. It wouldn't be much of a challenge to see someone with a gun or other weapon taking aim at a politician and have the security blow their noodle pack out their heads. And going back on the point, people are often distracted by work and other things, plus people in general are complacent, rarely actually making any sort of change. The current protests in America wouldn't have happened if people still had work to do, but all of that was cancelled due to a pandemic that made it so people didn't have to go to work or school and if they did it was transferred online. You would have to drive it impossible for the blue collar man to work, be entertained and to feed his family. Unless you have a national drought, national supply chain shortage and national blackout in your gun safe, it's not gonna happen. You will have to be content with a nukes or to nukes or to nukes and are easily replaceable in the long term. If you assassinate a puppet, you have thrown your life away for nothing. Infrastructure, industry, food production and standard of living are the only rational targets in any event. Killing people makes no sense when it will do nothing for you but get you fucked in the ass in jail, unless it is some type of personal beef and dealt with in a way you will get away with. Who the leader is really has no bearing on your life when they all work for the same team.

What You Should Do If You Ever Wind Up In A Government Building During An Attempted Overthrow:

- Do not go to the event if you are over 50 years old. Stay the fuck at home, faggot boomer.
- Do not go if you are female or have/had two titties and a cunt. Stay home, you stupid three hole flashlight.
- Do not go if you are a fucking Karen GOP lover.
- Do not go if you intend to bring signs with your handwriting on it.
- Do not go if you intend to wear unique patches or bring unique flags found no where else and doable straight back to you.
- Do not go if you are fat, have a bad heart, bad back, leg sprains, if you are a realtor, a grandparent, etc. Take your flabby, blubbery ass back to Burger King.
- Do not go if you have a Facebook, Instagram, Twitter, etc. Go the fuck home and stay there.
- Do not bring your cellphone or any electronics to a riot in a government building. No tech or you have to go back.
- Cover yourself from head to toe, wearing no patches or waving any flags typical of Trump, MAGA, QAnon or any of that Cuckervative boomerigger shit.
- Do not speak, use military hand signs. If someone has cameras and mics and you're showing face and talking, you are being your own prosecutor.
- The only thing you need to bring is Baofeng Radios and LOJ wristbatches.
- Bring cell phone and spare to give your jammers to give all Federal Agents/Police communications. This may/may not affect military/national guard.
- Sneak Lofantani1.DMSO on keyboards, mouses, doorlocks inside the room, on personal effects so whoever touches the shit gets an instant OD 400x the normal overdose for elephants and dies.
- Use a Linux Live USB to forcefully crash (clone) their drives. If you can't do it, copy everything to a flash drive. Drop it in the mailbox of the Russian or Chinese embassy.
- Take the hard drives/SSDs from the politicians computers. DO NOT TAKE PHONES OR LAPTOPS.
- Put a virus in the computers. Preferably encryption virus that permanently locks them out or a trojan.
- Avoid all the cuckservative boomer faggots doing the MAGA/trumpedard shit. National Socialists and Fascists should be way smarter. Get in, get intel, get targets and get the fuck out.
- Actually know the layout of the fucking building you run up in before you fucking show up. Have a laminated map with you.
- Bring 7 Watt 445nm Blue Laser Pointers and 190-540mm 006 Laser Safety Goggles
- Do not allow your group to be split by a nigger police officer deliberately touching your shoulder for you to chase them. Avoid what the dumb elderly retards are doing. Fuck the noise. Tune it out.
- Avoid shitting, cumming, pissing in the building.
- Bring zip ties or flex cuffs. They restrain captives.
- Bring TINK keys, handcuff keys and ceramic blades. They get you out of cuffs.
- Do not trust outsiders who are not in your circle, the circle you came with to do real nigga shit. Do not allow some QAnon faggot in your natsoc circle and conversate and do not join theirs. Don't cheer with them. Don't boo them. Ignore them.
- Take a polaroid/inst cam, so you can get photos.
- Set the building on fire. Actually destroy the institution at the physical level. Fuck the other people there. If they're smart, they'll leave. If not, you get roasted retards for dinner.
- Blind your targets with lasers. If you have to, blind cuckservatives and law enforcement who are physically in the way of you and your target. "BUT THEY'RE WHITE/MY RACE-" Yeah, shut the fuck up. That person would kill you or turn you in. They are not your people. They are slaves.
- Slaves chose their side. If they are in your way, blind them. If they try to put your laser from your hand or your goggles from your face, shoot them in the face. If they rush your friends, shoot them in the back. But shoot them.
- Use revolvers and rifles with brass catchers if you are doing on-site executions or executions period. Use frangible ammo only. Leave no slug with striations for ATF ballistics. Leave dust and only dust as you are a ghost.
- Leave no shell casing to deal with you nigger. You don't.
- Take your target away immediately. Once you grabbed who or whoever your dudes were intent on clapping, get the fuck out, don't steal or put your feet on a desk for some photo. Don't steal cards or letters like that one dumb cockeyed redneck looking like an any Imao.
- If someone takes a picture of you, take their phone and smash it. I don't care if you are a Nazi and they are a 200% "insert your race/ethnicity" Cuckservative. Fuck the morals. They are not Nazis like you and that is all that matters. Smash that shit. No pictures.
- I personally believe that for someone to be my kind they have to be the same race/ethnic group, AS WELL AS having the same mindset and beliefs. If you are the same as me but Republican, you are not my ally. You are my enemy, you neoliberal fuck faggot.
- If shitties care about their image, they will stop you for being a cunt and stop waving for grifters and cunt leaders.
- Have a killsite established in a pre-arranged location for the targets you captured. Be sure to film them with a camcorder. Have a script for the person to read. If they are blind, tell them what to say. When they finish, done them.
- 1080p, 4K and closeups are gold in the film world. If you do it, show us the electrons in their neurons and every fold in their brains.
- Get on a Tails Linux laptop and wipe the metadata from the video. Upload the video over Tor to Datafilehost, Solidfiles, Anonfiles or some other filehost.
- Get a Second or other darknet to clearest email account and send the link of the video to Daily Mail, RT and SOF. Then Reuters, MSNBC, FOX, CNN, CBS, ABC, etc
- DO NOT WRITE A MANIFESTO. YOUR VIDEOS AND YOUR ACTIONS SHOULD EXPLAIN YOUR MOTIVATIONS BY HOW YOU CARRY YOURSELF AND WHAT YOU BELIEVE IN. YOU NEED TO BE COVERED HEAD TO TOE. USE A FAKE NAME FOR YOUR GROUP. DO NOT NAME THE GROUP IN THE VIDEO. USE A PSEUDONYM LIKE "HITLER'S BONE LORDS" AS OPPOSED TO "THE NATIONAL SOCIALIST EMIL OF KENTUCKY"
- Once you kidnap the target(s), Make them take off all jewelry, lapel pins or anything that could be a GPS tracker. If they can't, sock them and do it for them. Wear gloves and dump it at the government building

- Crop The Video, Edit Sounds Out From Animals Or Construction. You should be in the woods or in a warehouse, away from landmarks or any doxable place.
- Strip then and burn their clothes completely before the video. (Removes any DNA from when you grabbed them)
- Leave The Corpses At The Scene, Torso Into Water (Because your skin cells and sweat from your hands are on them from when you grabbed them).
- Bonus Mode: Hang them from a overpass bridge at night, like the cartels do for a power demonstration. (Unlikely to work because DNA evidence.)

Lastly, never forget the line from MF DOOM's - Rap Snitch Knishes and remember it before you do anything in life:
 "Rap snitches, telling all their business, Sit in the court and be their own star witness, Do you see the perpetrator? Yeah, I'm right here. Fuck around, get the whole label sent up for years."

How One Could Commit Stabbing/Cutting In The United Kingdom And Avoid Jail - 100% Success Rate

You Will Need:

- Eagle Pair 190-540nm OD6 Laser Safety Goggles
- A 7 watt 445nm blue laser pointer
- A black ski mask with a black hoodie, black pants and some black shoes. Most importantly, WEAR BLACK LEATHER GLOVES.
- A knife, preferably fixed blade with a sheath that can be washed in laundry. Ask yourself: Do you really want to fuck around with a pocket knife, at night, with orange goggles on your fucking face? NO.
- I recommend this kind of knife for slashing: <https://www.ebay.com/itm/363152231688?hash=item548d8f4cb8:g:D-1AA05w8NtFlwU-6var=632388286449>
- I recommend a double edged for stabbing: <https://www.ebay.com/itm/294192449883?epid=8012074976&hash=item47f3c895b:g:sd4A05w6s9grCSX>

0) Learn laser safety. After you learn, avoid aiming at water, white objects, metal, mirrors, glass, yourself, pets or loved ones. Wear your goggles at all times you handle the laser.

- 1) Put on your laser safety goggles and take your laser and your knife with you.
- 2) Burn the CCTV cameras with your laser. You can also use a laser to turn off street lights
- 3) Blind the person you're gonna stab put it directly in their face for like two minutes, with respect to the duty cycle, allowing it to rest after the 60 seconds of beaming.
- 4) Stab the shit out of that motherfucker in the stomach and chest, with your gloves on.
- 5) Sheath your knife (NOT WHILE RUNNING YOU DUMB FUCK) and get the fuck out of there.
- 6) Wash your knife, sheath and clothes.

Fuck Fireworks:

I notice Antifa uses fireworks because leftists are stupid as fuck and fireworks are all they can get. Fuck that shit.

- Buy black powder, BB gun 12g CO2 canisters, visco fuse and drill bits.
- Drill a hole into the top of the CO2 canister after you use it or puncture it to make a bigger hole.
- Put black powder into the CO2 canister.
- Put visco fuse into the canister and seal it with glue. Use hot glue at your own risk. Foam glue or some kind of putty is best. No cyanoacrylate/superglue.
- Congrats, you now have a small IED.
- Here is a video of a CO2 canister powder charge: <https://youtube.com/watch?v=x8X2u6EP8c> - CO2 Cartridge Pipe Bomb (PB6)
- <https://youtube.com/watch?v=UJFP9uR0NY> - Pipe Bomb PB4

- Get bottles, liquid HCl Drain Cleaner/Toilet Bowl Cleaner, aluminum foil and a 2 liter coke bottle.
- Make quarter sized foil balls. At least 12. Put them in first. Fill up the bottle with drain cleaner just enough that the balls are almost submerged. Seal it immediately. Make sure it's sealed. Shake it, toss it.
- This is a Works Bomb. In 10 - 20 minutes, it will go off. In a confined space, it is dangerous. In a riot, it is a noise maker louder than a gun and a diversion device.
- Here is a video of a works bomb: <https://youtube.com/watch?v=63FsJH5wM6> - Squirrel & Tuna 5 Gallon Works Bomb

- Get Styrofoam cups and Gasoline and a 5 gallon bucket.
- Break up Styrofoam and add gasoline slowly, stirring.
- The foam will dissolve into the gasoline.
- You will eventually wind up with a dough like material that is highly sticky and very flammable. This material is like napalm and will burn for hours.
- It is not safe to handle bare handed near a source of ignition.
- You can burn cars to the frame with a handful of this material.

Videos Of This Mixture:

<https://youtube.com/watch?v=8vLESJmLg8>
<https://youtube.com/watch?v=mlMRQaw694>
<https://youtube.com/watch?v=4mYooAFko8>
https://youtube.com/watch?v=9RD_LH2C0IM

- Get iron oxide, powdered aluminum, a metal thermos for coffee and magnesium ribbon.
- Here is an infographic: <https://archive.is/0J4Ly/S84809f0f8a6d1ca3f47df98848bee356701685.png>
- Put the thermite in a coffee thermos to concentrate the thermal energy and the flow of liquid thermite into the hood of a car, a pipeline, a locked hatch, etc.

Videos Of Thermite:

<https://youtube.com/watch?v=M32kaNF2ybg>
<https://youtube.com/watch?v=zR2fTJe2Ztg>
<https://youtube.com/watch?v=rdCsbZf1Ng>
<https://m.youtube.com/watch?v=R0Qnig7Cj88>

• Negative X:

<https://youtube.com/watch?v=I7V0vLvwqI>
<https://youtube.com/watch?v=b4Bzd0JG54>
<https://youtube.com/watch?v=xVR1vDk0Sd8>
<https://youtube.com/watch?v=65JTYmkhRfE>
<https://youtube.com/watch?v=t8k8yaz-7Rs>

- Get chlorine pool tablets and brake fluid.
- Crush pool tablets into a fine powder.
- To start a fire, pour brake fluid on it.
- To create an explosion, put chlorine powder into a ziploc bag. Seal it all the way up to one corner. Leave one corner barely open. Fill a small coke bottle halfway with brake fluid. Roll bag into a tube and insert the bag slowly. Seal the bottle up tight. Shake it as hard as possible for five seconds and throw it immediately. It will pressurise and explode, like the works bomb.

Videos Of This:

<https://youtube.com/watch?v=5SNPtUcTm0>
<https://youtube.com/watch?v=0ckbD0Adnp8>
<https://youtube.com/watch?v=5845XIS7Z2c>
https://youtube.com/watch?v=tlm_BCHN5jbc
<https://youtube.com/watch?v=k0NMVv4daM>
<https://youtube.com/watch?v=quxy3gYTA>

- Poor Man's C4
- 9 Parts Potassium Chlorate, 2 parts Vaseline. (9/2 works better than 9/1 allegedly)
- Mix into a paste completely.
- You will need a #8 blasting cap for detonation.
- This is very stable.

Chaos And Accelerationism

What are you? Leftist? Right wing? Nazi? Commie? Centrist? Gay? Ask yourself these questions and conceptualize what your tribe is and the cause you fight for. For whom do you fight? Ponder on it. Unless you are in the middle of a riot. Then stop doing that shit and fucking focus. You have a group and a cause and you came to blow some shit down so what y'all on? Are you on that time or not? Ask yourself this. Be mindful that there are at least fifty motherfuckers around you with cameras so if you didn't mask up, you clearly fucked up.

Everyone is screaming and freaking the fuck out.

People are smashing windows. People are being shot by foam batons and rubber bullets.

The gas is flying. People are getting maced. Reinforcements are coming.

The ADS is being used. The cops are about to club you and your buddies.

What is your intent in this riot? Ask yourself this.

If you came to steal guns, steal guns. If you came to steal money, steal money.

If you came to fuck shit up, fuck shit up. But, it's not always that easy.

You need plans. You need to be able to defend yourself. And, you need to be able to do shit.

If you want maximum chaos on the streets:

- You need to go after infrastructure.
- You need to pass out weapons to the crowd.
- You need to be bold.
- You need to be fast.
- You need to plan with some cats you fuck with and trust.
- You need to be smart, i.e. No cellphones.
- You need to be hoodied and masked up. Head to toe.
- You need to have patience
- You need wisdom.
- You need to think outside the box.

What should you or at least one of your dudes take to a riot?

- Cellphone Jammer
- WiFi Deauther
- USB Killer
- H&S Rubber Ducky
- Boofeng
- Flashlights
- Melee Weapons
- Laser Safety Goggles and maybe a laser, though probably not if you came in a group. Just take the goggles, all of you.
- Two different sets of all black clothes, head to toe, a second set for all of you, in the car.
- One set normal clothes in the car for all of you.
- A duffel bag or backpack
- A reciprocating saw with carbide steel blades
- Charged extra batteries
- Bolt cutters
- Padlocks
- Drills
- Flash drive with ransomware or something on it
- Guns with brass catchers and suppressors
- Smoke grenades.
- A vehicle you can walk to, half a mile from the riot, away from cameras.
- A plan with two back up plans
- A brain
- Some armor

Make sure you can be mobile with the loadout your small cell group chose.

There are many ways to fuck up shit in a riot. You could put ransomware on a bank computer during a riot.

You could steal some new phones, some guns, whatever. You could fry a bunch of computers.
You could capture the 4 way handshake of every router in the block and have free wifi in that area for life.
You could destroy junction boxes, saw down pylons, block bridges with stolen cars.
You could shit on food in a grocery store aisle, making them throw everything out.
You could do a lot.

Melee Tips:

- Never use cutting blade metal knives for combat. If you must, carry a ceramic cutting blade. It will have a metallic content but it will be negligible compared to a steel blade. This allows you to go many places armed.
- Obtain thick polymer knuckle dusters for assaults and hammerfist blows. These knuckles will be undetectable by a metal detector. Again, a weapon you can carry almost anywhere.
- For a stabbing weapon, obtain a polymer spike weapon. It will be undetectable by a metal detector.
- Polymer weapons are only detectable by conveyor belt X-ray scanners typically found in checkpoints with bodywide metal detectors.
- Polymer weapons are also detectable by body scanners typically found in airports.
- Many courthouses have no body scanners. They only have metal detectors, allowing polymer weapons to be brought on the person.
- All state capitol buildings have no body scanners. They only have metal detectors, allowing polymer weapons to be brought on the person for offense, defense or assassination.
- Low level government buildings can not detect polymer weapons.
- Steel toed boots can be worn in every government building and hospital. It is not illegal.
- Steel toed boots are a good self-defense tool.
- You can wear your boots and be walked through a checkpoint.
- If you must carry a metal weapon, carry triangular pointed metal knuckles. These edged concentrated points maximize damage and fracture bones with ease. Also, spring batons. It is only illegal if you are caught. Obviously you can not take these anywhere near secure places.
- Another good weapon is weighted knuckle gloves, also known as leather sap gloves. Wear a motorcycle jacket or motorcycle gear to justify wearing weighted knuckle gloves. In a totalitarian shithole like NYC, sap gloves are legal. You can beat the shit out of people with sap gloves while protecting your hands.
- A good concealed knife is a wallet folding credit card knife. They are polymer and metal. They are highly concealed, lightweight and good for stabbing and cutting.

*Note:

- You can NOT wear any of this shit (gloves and boots) in an airport without getting hard scrutiny, nor can you carry any of these weapons in an airport. Check your local laws. If your state bans metal knuckles, carry polymer.
- In Minnesota, NYC or DC, both are banned. Wear sap gloves. Or carry them anyways.
- In my home state, you can open carry metal knuckles but concealed carry is illegal. Polymer knuckles are not even discussed so it is grey legally. It is safe to assume you may conceal carry polymer knuckledusters. However, if you use them, expect "assault with a deadly weapon" charges.
- DO NOT USE MELEE WEAPONS. EVER. IF YOU CAN HELP IT. It is a legal nightmare to explain melee self-defense under a justice system biased towards weapon ownership and freedom. You're better off with a gun in many cases. Baseball bats and hammers do not a self defense case make.
- The best weapon to use in defense or offense is a gun or a laser pointer in the 7800nm and above ranges.

Bodies:

- There are only five common sense ways to truly eradicate a body, human or otherwise.
- Cremation
- Alkaline Hydrolysis
- Promession
- Nuclear Detonation
- Feeding Bodies To Sharks, Gators, Hogs, Etc. (Pig Farms)

You likely do not have nukes so vaporization is out of the question. You also do not have a sun or black hole so there goes that. If you are friendly with a mortician who cremates bodies, you may be able to slip one more in on Anne Frank night if they don't have cameras. If you have a alkaline hydrolysis machine, you can ligferly bodies into a nutrient soup. But you likely won't. A mortician will. Promession or freeze drying is another way to powderize and disintegrate a body. But you likely won't have this technology. Few places do. You can feed a body to gators or hogs if you have a Floridian friend or some pig farmer connections. If you're near sharks, go feed the faggot to the sharks or whales before they rot but remember people float because they are full of gas and the lungs act as balloons. So, you might fail here too. Dissolving a body in acid is Hollywood bullshit. Even cartels know that shit isn't true. It takes years. That is why they leave these barrels full of acid or lye after chopping some fucker up. Don't believe any of that Hollywood shit. Get into a mortician job or get friendly with one or you will not be able to dispose of a body ever. The methods I included from searching on the Hidden Answers onion are legitimate. These will totally dispose of the body. There will be nothing left, not even bones or teeth or hair. Alkaline hydrolysis is the most efficient way of disposal of bodies. Get access to a alkaline hydrolysis machine or get one. There will be nothing left but bone shadows (crumbly fragments). Cremation is less efficient but is the second most efficient way to dispose of a body. Buy a livestock incinerator and a farm Promession and alkaline hydrolysis are environmentally friendly, provide nutrients, are cheaper and better than burial so you should probably ask about it for your funeral arrangements. Much less than a 20k box. Cremation is cheap but ashes can do fuck all nothing. But anyway, back to the subject - Get a cow sized incinerator, ONLY IF YOU A FARMER. If you try this with no farm, you're getting warned probably. Get cows, get ranch, get incinerator.

If you are even remotely connected to the person, the police will come to your door eventually. You have to destroy every cell in their body. Pigs can eliminate everything but hair and teeth. Crush all teeth, shave all hair and burn it in a livestock incinerator. If you can, put the whole body in a livestock incinerator. Once they are Jewish, put them in an urn and rent a car and take a road trip. A very, very, long, cross country road trip. Don't bother with dumpster them, too risky, since one of those parts is going to be where you chop them up and ashes will be suspicious. Check satellite maps for an area with little to no habitation. If you're in a country with logging try to find some logging roads near a stream, drive far up them, drive off the road a little bit and hide your vehicle. You should be sure to cover up any tracks once you leave (wear shoes with patternless soles btw). Start walking up the road away from the vehicle before walking off the road towards a stream. Dump some of the ashes in the stream. Go to another stream on your cross country trip. Dump some more. Another stream? Some more. Another one? Gimme some more. Once that fucker is gone, toss that fucking vase in the ocean. If you chopped them up, feed the limbs and upper torso to the pigs. Cut the torso in half and keep the lower half for a day or two if female so you have some fuckmeat in the fridge. Feed that to the pigs on day three because eventually you can't fuck it anymore. Meat goes bad. If they won't eat it, incinerate it. Put the head in a cooler. Walk until you can't walk a step farther. Then keep walking. Once you're suitably secluded dig a narrow hole at least 10 feet down. At the bottom dig out a section, lengthwise the height of the head (perpendicular to the narrow shaft) and put the head in it. Refill the hole with all the dirt you used and pack it tight all the way, try to get all of the soil on the surface spread out again or in the hole. Get some plant matter (grass or small shrubs) and plant it on top of the hole. This will make it very difficult to tell there was ever a hole there.

Leave and pray to whatever god you have. On your way home, dump whatever tools you used on the side of the road or in a dumpster or something idk (a thrift store would work well too). Of course you'll need an alibi too but that's your job. The in-vogue sterilizer in the forensics world today is ethylene oxide gas. An evil scientist probably doesn't care about OSHA and carcinogens, etc, so just cooking the room in ethylene oxide would probably be the easiest solution. It's a well-known disinfectant and will destroy all microorganisms and render DNA unusable for any purposes you can guess, it's also highly toxic and is applied in very controlled environments so as not to expose the operator to it. You obviously can't autoclave an entire room, but you can just pump a gas into it. Here's a scholarly snippet for you: Comparison of the effects of sterilisation techniques on subsequent DNA profiling. "Four sterilisation techniques (UV, gamma and beta radiation and ethylene oxide treatment) were examined for their potential to degrade contaminating DNA to such an extent that subsequent DNA profiling was impossible. This work indicated that the most successful technique to reduce DNA contamination was ethylene oxide treatment." PCR machines are used in the medical field to test for certain types of DNA (or RNA) to detect certain things, usually viruses. I'm not going to go over how a PCR machine works (that's another whole answer there) but suffice to say that they're used for DNA detection. A 10% sodium hypochloride (Bleach) solution is the recommended method of cleaning the machine to prevent DNA contamination of the next sample from the previous sample. Don't be at the scene and don't go near the body and you've got the problem. Shoot the guy from 300 yards away with a scoped rifle, take your shell with you and use frangible ammunition. If the police don't find the spot you shot from, the only evidence they will have will be the bullet but since frangible ammunition disintegrates, they won't have it. Melt the shell. Consider the method Mohamed and Malvo used. Look up the DC Sniper. All credits to Quora and Hidden Answers for this shit.

Raping Female Politicians, Male Politicians' Wives & Daughters:

First and foremost, pebarnbind any woman you are going to rape with a 445nm laser that is at least 7000mw (7 Watt). But, if you insist on not doing that, dox the politicians' daughters or the femcunt politicians themselves. GOC employees and media personalities also count here. Rehyprol was a very popular choice for date rape. It was used in clubs, bars, restaurants. It is tasteless and odorless. The girl acts and appears very drunk and cannot remember what happened afterwards. It was so popular that the new Rehyprol tablets have a blue dye core so that when put into girls drinks, clear drinks will turn blue although it is harder to see in dark drinks such as those mixed with Cola. From what people say there are still alot of the older tablets available however that are colorless/odorless/tasteless. There are others but I believe that was the most popular. It is a very powerful drug and must be carefully administered like most drugs. Usually girls should be in groups, with at least 1 girl staying to watch and make sure their drinks are not spiked. However, a politician's daughter is a rich brat cheerleader type, not a smart nerd girl or a art hoe wallflower or a goth chick. You can use scopolamine to get a girl to fuck you but that is not gonna be in the USA most likely and that is not what this is about. This isn't about getting your dick wet, it's about conveying power on a politician's body or their family. Don't be a good rape and you've got the problem. Shoot the guy from 300 yards away with a scoped rifle, take your shell with you and use frangible ammunition. If the police don't find the spot you shot from, the only evidence they will have will be the bullet but since frangible ammunition disintegrates, they won't have it. Melt the shell. Consider the method Mohamed and Malvo used. Look up the DC Sniper. All credits to Quora and Hidden Answers for this shit.

Hydroxybutyrate is easy to prepare - Has no taste in orange juice apparently. If you find or prepare it, only use 1 teaspoon or less for 500ml of drink. DONT EVER USE MORE.

Order the bitch two Screwdrivers at a bar with extra juice and put half a teaspoon in each.

If you don't know what a screwdriver is: [https://en.wikipedia.org/wiki/Screwdriver_\(cocktail\)](https://en.wikipedia.org/wiki/Screwdriver_(cocktail))

But, back to reality here. Get dox on the political bitches. Blind them and rape the fuck out of them.

If she picks you out of a lineup, they will test you. Blind bitches don't pick people out of lineups for rape.

You would need:

- A dick extension as they can tell what size the rapist has.
- Use a condom to prevent dna testing from precum and a mask would also be helpful
- Wear a full face halloween styled mask.
- Don't talk because if she hears your voice, you can be identified
- To shut the fuck up. Never talk about it, never confess to the priest, the cops or a friend. Never tell anyone shit.

If you want to increase your chances of not being caught:

- 1) Shave your fucking pubes. Shave your entire body, everything including eyebrows, lashes, arms, legs - everything. If they find one hair or dandruff/skin flake, you can be identified. Make sure not to spit, sweat, sneeze, flick a booger or ejaculate. Even pre-cum will fuck you over. USE CONDOMS.
- 2) Make sure not to carry ANY of her hair away from the scene. If they can find one eyelash in your car or on the sleeve of your shirt, you can be identified.
- 3) Wear gloves on your hands. Leather.
- 4) Do not take any fucking souvenir from her - panties, earring, etc.
- 5) Do not take a video or photo of anything. NEVER FILM HER RAPE. HER VOICE OR BODY MARKINGS OR CLOTHES WILL GIVE HER AWAY AND CONFIRM THE RAPE HAPPENED, PUTTING THEM ON YOUR TRAIL AND SHE WILL DESCRIBE YOU.
- 6) Do this in a area without cameras.
- 7) Pour water onto the ass and pelvic area so any possible thigh and hip sweat can be washed off.
- 8) Make the female douche with Sumner's Eve.
- 9) Give the bitch Plan B because her Plan A to not get raped failed.

Surfice it to say, there are A LOT more ways for you to get caught than ways to get away with it. Just don't even do it. Blind the bitch and be done with it. Rape is fucking despicable. Unless Jewish. If a bitch is Jewish, her rape was justified and she deserved it. A Jew is less than a pig. Rape them and stonportinate the semite baby. Jews facilitated the Transatlantic Slave Trade and now they are carrying out the Great Reset and Kalergi Plan. Jewish people suck baby dicks. The only good jew is dead or chained at the ankles and raped until their jewish tricks and spirit is no more. The best thing to do to a Jewish bitch is make her suck a dog dick, lick horsecocks, get fucked by boars like those Whitney Wisconsin-tier Art07Zoo/K9LadY bitches on LuxureTV, then pimp her out to niggers, with no rubbers. Species-mixing is wrong and so is race-mixing but there is nothing wrong with an animal like a Jewess. The only scenario in which you could rape a bitch is if she is blind and can't fight back or do anything. With a high powered 7 Watt Sanwu Striker laser, blind the bitch over a thirty minute period. 60 seconds on, 30 seconds off, 60 seconds on, 30 seconds off. Gag her, tie her up, put the laser about less than a foot from her eyes, burn her eyes out. After thirty minutes, rape the shit out of that bitch. Be sure not to groan, moan or say anything because if she remembers your voice, you may be fucked one day.

See Resources On Obtaining Precious Metals:

Videos: <https://pastebin.com/cu9Yfrrt>

Books: <https://pastebin.com/qR5d4ct>

Dealers: <https://pastebin.com/9feTtMx2>

I Have BTC, How Do I Cash It Out?:

- Use Trust Wallet, Coinbase, Wirex and KuCoin.
- Use TextNow for verification.
- Avoid Paxful, Phenex or any of those faggot ass scammer exchanges.
- Cut out the (((middleman))) and (((Kenyan/nigerian))) traders. Just avoid Paxful 100%.
- Avoid Vemo and CashApp.
- Coinbase can lock your funds so be cautious and avoid it.
- Move your shit to Bitpay and convert it to USD after applying for the virtual card.
- Store your shit on the Electron or Trust Bitcoin Wallet
- Apply for the Virtual and Physical Bitpay Card
- Once approved, you can use the virtual card ASAP.
- Send the desired money from Trust Wallet to the Bitpay wallet.
- Move it from BTC to USD balance via loading your Bitpay card.
- You now can use your BTC card to buy shit Like a VISA Debit Card.
- Once you get the physical card, you can make cash withdrawals.
- Congrats, you didn't have to deal with some Paxful sped scammer niger or some faggot from LocalBitcoins.
- Go straight to findbullionprices.com and buy silver.
- Get some XMR/XLM/ADA/SOL/ALGO as well.
- Invest in Chinese and Russian Lithium, Copper, Silver Mines.
- Use KuCoin to exchange Crypto.

Stonks:

- Never use (((Robinhood))). Do you due diligence and find a less jewy stock site.
- Buy stocks in companies that will exist, even when the USA falls. Think global - Coca-Cola, Pepsi-Co, McDonalds, etc.
- Invest in Russian and Chinese shit, even Iranian. Diversify your money.
- Buy stock in companies with low prices and take companies over.
- Short any and all faggot kike hedge funds.
- Buy a shell company in a tax haven country.
- Set up a clause in hiring contracts that you can not be voted out or fired.
- Flip declining companies. Become CEOs and use your money to help lobby for the right. Help other anonns. Drop them a couple hundred BTC so they can do the same shit.
- Use WeBull. It is Chinese owned.

Metals:

- You're not lugging a fucking treasure chest with pounds of metal when SHTF.
- Get a bunch of copper, silver and gold. Bars and rounds. But, trust me, you'll need bars.
- You will need metals after the war and collapse, to back the new currency.
- Many people who buy metals are delusional as fuck, thinking they will buy a 16.9oz water bottle full of diesel with a 1oz, \$27 silver bar. This is niger-tier thought. Get some of those multi-bar Valacambi shits and keep like 20 ounces of silver on you in 100 gram bars at all times when you go out publicly on your daily SHTF expedition.
- The only currency during a war or collapse is labor, food/clothing, shelter, gas, ammo, knowledge. Considering knowledge is power, you should thank me for paying you.
- Get airtight sealed containers and then fucking cache your precious metals in a Pelican case that is waterproof, deep underground.
- Geotag that shit and be sure to bury deep and put a dead dog or something on top of it on your property or in a crawlspace. No one is stealing Fido so your metals will be safe.
- After the war, go get your 100oz and 100z shit back and introduce it to the market for the new money.

Obtaining Monero:

If you're going to transact in XMR you might as well purchase XMR directly. Buy from an exchange, withdraw to a wallet, send to a new wallet. You'll be on the record as having purchased XMR but your funds will now be anonymized. There's no point in using Tor until you're sending XMR from your Tails wallet. Reason being that the exchange will know that you're the recipient of the withdrawl so that wallet is not anonymous. Once you send to the Tails XMR wallet (or any XMR wallet) the exchange can no longer directly tie you to the funds unless the XMR blockchain is compromised which is highly unlikely for the foreseeable future.

How You Need To Handle Monero:

Exchange -> XMR wallet on Windows -> XMR wallet on Tails -- Anonymous transactions

Making Fast Money:

- Rob NGO/Elite fundraisers.
- Rob state fairs. Get \$50K+
- Rob money trucks. Get \$50K+
- Rob vending machines and car washes. Get thousands.
- Do not rob banks, convenience stores or any place with lexan windows.

Information on robbing vending machines:

Never for any fucking reason and I mean any, donate organs in the United States of America. Fuck liberals, Marxists and blue city niggers. If they want to play dirty like this, you play dirty too. Say NO to being an organ donor. Let your healthy organs go to the grave with you while all these blue eyed pixie shorthaired tranny faggot freaks with myocarditis die on the bed crying because there is an organ shortage. Let these faggots rot in hell. If you need an organ, these vaxxed faggots in their compliance cult will ensure your new heart has myocarditis as well, not to mention AIE as well. Don't get an organ transplant in America, Europe or anywhere the Pfizer/Moderna/36J shit was sent to. Get transplants from people in Russia or China. Meet your donor's family or meet your donor if they are alive and ask them what they got. Make sure you are not getting the mRNA bullshit that these World Economic Forum jewish faggots like Bourla are involved in. The shit they got in China and Russia was much different from the mRNA death juice. Sputnik and Sinopham are much different than the shit Ameritards are being pumped with. It is painfully clear the American shit that is even being exported to Europe will negatively affect all who take it. Demand a non mRNA treatment or non-mRNA vaccine or leave the country. Demand monoclonal antibody treatment. Lastly, fuck Donald "Jewish Gun Surper" Trump. He betrayed all you faggots to worship him and the shit he got for his vaccine is not what they will allow the inferior plets to have ever. Knowing this bullshit vaccine is dangerous and knowing they are still trying to force it on you anyway and basically kill you with it, that would be the time to start docking people, going places without your cellphone or smart tech to get used to travelling without being traced (or having access to E911) and buying replacement gun barrels, ejectors, firing pins, extractors and getting hiking GPSes and laminated maps to get the drop on these motherfuckers first. These people have names, faces, addresses, money, jewels, cars, clothes, wives with vaginas, sisters with vaginas, mothers with vaginas and in some cases daughters with vaginas, ripe for the fucking.

How To Get Endless Free Vulns From Shodan.io

(USE A VPN, NIGGER!)

0) Disable IPv6 in your device.

If you use Linux, open a terminal and do the process listed in the following links:

<https://itsfoss.com/disable-ipv6-ubuntu-linux/>

<https://www.techrepublic.com/article/how-to-disable-ipv6-on-linux/>

<https://www.linuxbabe.com/ubuntu/disable-ipv6-on-ubuntu>

1) Have a VPN on. I recommend NordVPN. Be connected to it.

MAKE SURE YOUR IPV6 IS disabled.

You can get free cracked NordVPN by looking up "NordVPN cracked accounts telegram"

Alternatively, you can go to crackingtutorial.blogspot.com

2) Enable the Firewall, the Killswitch, etc.

3) Make a Yandex.com account. Select "I don't have a mobile phone number" Be sure to remember your security question answer.

3A) You can also use temp-mail.com

4) Make a Shodan.io account. You will get a free API and at least 20 searches a day. Search for shit like this:

authentication disabled

pipeline

oil

water

pump

pipe

vnc

municipal

power

level

temperature

Alternatively, you can use the search queries herein.

You can search any country, OS, port that you want to search.

DO NOT CLICK THE IPS, DON'T TRY TO FUCK WITH ANYTHING. ACCESSING THE VNC SERVER WILL GET YOU FUCKED UP, UNLESS YOU ARE SMART.

Print the page you're on, Save to PDFs. This way, you get the vulns without being hit up because you have to pay to export the data.

Do you honestly want to pay 299 dollars to make a fucking list in your account?

Stay on the page and you can just print to PDF, keeping the IP, server info. This is good for VNC servers with authentication disabled.

5) Once you hit the daily API limit, log out of Shodan.io, switch VPN servers to a new VPN server.

6) Delete your Yandex account. Go to this link and begin the process:

<https://yandex.com/support/passport/delete.html> or alternatively, go straight to this:

https://passport.yandex.com/profile/delete?mode=delete&origin=passport_profile

7) Enter your security answer and the captcha.

8) Delete your account.

9) Repeat Steps 3 - 9 as many times as you want.

Notes:

- I don't think Shodan bans or IP blocks but don't try to find out. Switch servers.

- Shodan and Yandex do not limit the amount of accounts you can create.

- You could theoretically do it all day from the same server.

- When you adjust the search filter on Shodan, it counts as a new search so that will shorten your daily allotted searches each time you change the filter.

- Do not start fucking with their shit.

- MAKE SURE YOUR IPV6 IS NOT LEAKING

- You can even delete your Yandex account immediately after getting your Shodan activation email and clicking the link.

Superweapon Concept:

Oculus Of Malcontent/Orb Of Misery/Sphere Of Contempt: Multi-Layered Effervescence Radiological Dispersion Device (MLERDDs)

Potential Uses:

- MLERD cluster "bombs" that will release multiple sphere to fall into rivers, freshwater lakes, water treatment plants.

- MLERD conical warheads.

- MLERD radioactive graphene filled anti-material bullets

- MLERD grenades

Description:

Radioactive Graphite Nanoparticles Within Microparticle Lead Spheroids with Elemental Sodium/Aluminium/Iron Oxide Shell, Hygric Trigger

Methodology:

The most logical method of executing a radiological attack for a hypothetical enemy would be, considering America's newfound ability to detect shielded ultra-heavy elements would be to use radioactive graphite encapsulated within a multi-layered spheroid. The outermost layer would be a water-reactive layer of elemental sodium that serves as a trigger for the next layer, which would be a mix of thermite materials aluminum and iron oxide of the finest granularity possible. This exothermic reaction, triggered only once exposed to water i.e. dermal contact, inhalation, ingestion would be sufficiently intense to release encapsulated radioactive graphite without alerting victims to the presence of the substance on their skin except in the case of intense exposure, which would lead to severe burns. There would be little difference between the production methods for this hypothetical weapon and the known methods for producing nanothermistic explosives, save for the encapsulation of radioactive graphite within a leaden capsule beneath the thermally reactive elements.

Rather than trying to atomize densely packed and easy-to-detect radioactive elements using high explosives, a technique likely to lead to an adversary's failure to achieve its objectives and one which draws attention to the possibility of a "dirty bomb," leading to shelter-in-place and general evacuation, a superior strategy that may become favored by adversaries would be to use pre-granularized spheroids of the sort described here. A radiological attack of this sort would manifest itself as acute radiation sickness pockets associated with detectable radioactivity in the bodies of patients in hospitals, but no detectable levels of radiation in the public venues where exposure occurs for days, weeks, or months, depending upon the time of the next rainfall in the area affected. Shipment disguised as talcum powder/cornstarch coupled with releasing the powder from a crop-duster or if aircraft not available, then using fans upwind from target cities would be most likely.

This is perhaps the most frightful of scenarios as it would likely lead to a very high fatality rate when cancers are taken into account over a period of years, with men exposed while walking down the street fatally exposing family members with a simple hug upon arriving a home at the end of the work day, and showering in water after an exposure, rather than eliminating the contaminant, would serve only to release it. This type of attack would be most likely, impossible to anticipate and would take weeks to recognize, well beyond the point where it could be contained. As for how difficult it is, it's probably quite difficult without some rather expensive equipment, but that equipment is now in reach for entities such as Iran. Being able to basically co-locate a bunch of little 'dots' of multiple different types of metal is at the heart of semiconductor manufacturing. Any equipment that can make semiconductors can be used to do this. In large quantities, it could be used to render whole regions uninhabitable. It could be smuggled in past international boundaries without being detected by any method in use right now and crop dusters could be used to spread it. Not to mention, you'd have to have access to radioactive graphite. For this, you'd have to have a nuclear reactor, unless you had a means of rendering ordinary graphite radioactive. A person could hypothetically use an old x-ray machine from a dentist's office and just run it 24/7 to ionize regular graphite, not sure what the power requirements and time requirements would be, though. Plus you'd give yourself radiation poisoning running an X-ray machine all day unless you had proper shielding. Chemical encapsulation has just as much potential to be deadly, but it isn't as persistent as radiological contamination. Nanofabrication technology being sold by China to other countries would be the likely means of achieving encapsulation on any kind of scale.

Structure:

Water Reactive Sodium -> Thermite -> Lead -> Radiative Graphite Core

Notes:

- Zeppelins/Blimps/Airships can release drones capable of releasing radioactive graphene dust or these spheres.

- If you can make semiconductors, you can make this.

- Must have a means to irradiate graphite.
- You can drop depleted thorium dust on people from drones also

How Iran Can Survive A War With The United States Of America Without Regime Change:

Before Any Of This:

- Iran must translate this or get an Iranian who speaks English to translate this.
- Go undercover and secretive with the Iranian nuclear program and keep working on the bomb.
- Be aware. The USA will plunge Iran into a civil war to avoid a US-Iran war, if they can. Iran is highly nationalist but also ethnically diverse. A civil war in Iran will lead to balkanization of Iran. You must avoid this at all costs.
- Form a plan to fall back into uninhabited flatlands of Iran, should Tehran fall to incursion. Order the Islamic Revolutionary Guard Corp to take power of the country in the event the Ayatollah and the regime are forced out.
- The Iranian government must unify the Kurds, Azeris, Lur, Arabs, and Baluchs with the Persians, if possible.
- Fortify infrastructure against cyber attacks by using Linux and OpenBSD instead of Windows.
- Get all nuclear facilities off of Windows, immediately. At the very least, order workers to use Linux or OpenBSD based laptops.
- Have all government computers running Linux or OpenBSD.
- Eradicate or make peace with the Sunni Muslims, preventing Saudi Arabian influence from entering the country during a period of unrest.
- Form a peace deal with Syria, Oman, Iraq, Pakistan and Afghanistan, if at all possible
- Place anti-air defenses near ports and ships on the Iranian coast and near training sites.
- Place anti-air defenses capable of taking out B-2 Bombers near Natanz, Esfahan and other nuclear infrastructure sites.

Next, the Iranian military must do the following, in the event of a direct confrontation with the USA:

- 1) Mine the waters in the Strait Of Hormuz. Mine the main highways in the South of Iran. Establish checkpoints into roads leading North.
- 2) Use motorcycle carriers to relay messages and orders instead of radio communications ONLY. Use coded messages. Use light signals to launch planes. DO NOT USE RADIO, FOR ANYTHING.
- 3) Relay all US ship coordinates to short range missiles and launch them, taking out the ships in the Strait Of Hormuz.
- 4) Use suicide speedboats loaded with explosives to ram US cruisers and aircraft carriers to explode them. Use camouflaged civilian boats as well. Target Dubai Airport and Abu Dhabi in the UAE with short range missiles.
- 5) Use anti-drone weaponry for drones.
- 6) Use cyberattacks on American and Saudi infrastructure, specifically oil and gas, using the Quds force.
Suggestion: Ransomware with no ransom and no means of decryption.
Target Saudi Arabian oil fields. Avoid ANY and ALL attacks in Europe, on European targets or soil.
Avoid ANY and ALL sleeper cell activation in Europe. Use defensive attacks for European forces only if they come to Iran.
DO NOT, UNDER ANY CIRCUMSTANCE provoke or involve NATO or the UN.
- 7) Launch anti-ship missiles off the coast of Yemen via Houthi rebels. Target oil tankers as well as American military.
- 8) Use mini-submarines to torpedo US surface vessels doing reconnaissance and surveillance. Use drones and a small strike force of planes to target from the air.
- 9) Order proxy militias in Iraq, Syria and Lebanon to target US military bases and troops.
- 10) Order militias in Yemen to mine the Suez canal with naval mines and to launch missiles at Saudi Arabia.
- 11) Target Saudi Arabia with Shahah-1 and Qiam missiles and artillery, going after ALL Water Treatment and Power Infrastructure.
- 12) Target Israel with artillery and rockets to overwhelm and exhaust the Iron Dome via Hezbollah. Order Syrian forces to capture Golan Heights. Support Palestinian forces. Have Palestians overthrow the Jordanian government. Have proxy militias fortify defenses in Lebanon and Syria to repel an Israeli invasion. Once the Iron Dome is empty, target Israel with some of Iran's supply of Shahah-3 ballistic missiles on key cities, hitting Dimona and Tel Aviv-Yafo first. Israel has nuclear weapons. Use must use an EMP on Israel or use anti-nuclear defences. Dimona and other nuclear sites must be the very first target. They have been included herein.
- 13) AVOID OVERT AND DIRECT RUSSIAN AND CHINESE MILITARY ASSISTANCE. EVERYONE WANTS TO BE VICTORIOUS. NO ONE WANTS TO BE NUKED.
- 14) Leave to the flatlands of Iran that are uninhabited. Have all the Ayatollah/Theocratic faction retreat to there and have the IRGC take power as a successor faction to establish order.
- 15) Return the Ayatollah to power via the military once the U.S. forces leave.

Hitler was a dumbass, but you don't have to be.

Israeli Key Targets In The Event Of A Israeli-Iranian War:

Negev Nuclear Research Center, Dimona
Negev Nuclear Research Center. Plutonium production and extraction facilities, along with other weapons-related infrastructure.
31.001504°N, 35.146723°E

Eilatbun
Eilatbun is Israel's second weapons storage facility. Tactical nuclear shells and land mines are among its contents.
32.760226°N, 35.412077°E

Kfar Zekharya
Suspected nuclear missile base and bomb storage storage facility.
31.766267°N, 34.88142°

Nahal Soreq
Soreq is the equivalent of the U.S. national weapons laboratories. The lab handles weapons design and construction as well as research.
31.766267°N, 34.88142°E

Yodfat
Suspected nuclear weapons assembly facility.
32.85093°N, 35.27916°E

Tirosh
Reportedly one of two Israeli nuclear weapons storage facilities. It is speculated that that Tirosh is the strategic weapons storage site, while Eilatbun is the tactical weapons storage site.
31.751963°N, 34.863524°E

Rafael
Rafael has been responsible for the actual assembly of Israeli nuclear weapons.
32.889534°N, 35.09119°E
